

UV Filter™

Germ-Killing Filter Media Works With or Without UV Lights to Improve IAQ

This advanced filter media offers superior performance with both germ-killing and odor reduction features. The filters are infused with **Goldshield™** an antimicrobial nanotechnology which has been proven effective against a wide range of airborne biological contaminants.

- Ideal for Use With UV Lights
- Infused with Goldshield™ Antimicrobial Surface
- Kills Bacteria, Germs, Mold, and Allergens on Contact
- UVC Resistant - No Shields Needed
- 4" Filters Fold Flat for Easy Shipping

Microbes are destroyed by microscopic structure of **Goldshield™**

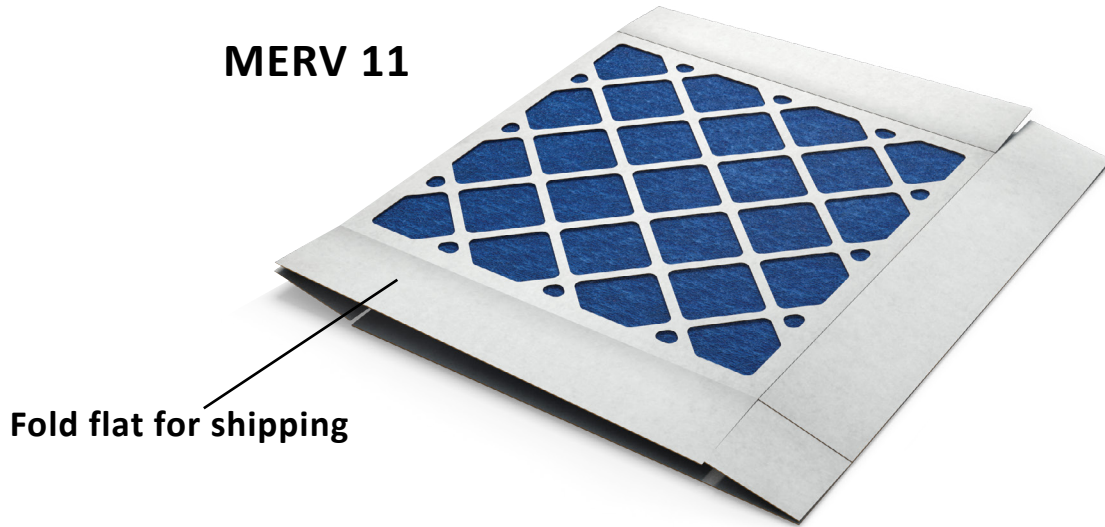

Fresh-Aire UV Filters feature **Goldshield™** a unique, breakthrough technology that is applied to our **UV Reactive Filter Media**. Airborne microbial contaminants that come in contact with the filter surface are destroyed by the microscopic structure of the **Goldshield™** process.

Goldshield™ is the first water-based, non-toxic, non-leaching application of nanotechnology proven effective against a wide variety of microbial contamination which is the third leading cause of mortality in the U.S., according to the Centers for Disease Control.
