It's Rheem.®

- 10-Year Conditional Parts Warranty
- High efficiency rating for electric cooling and 80% A.F.U.E. rating for gas heating.
- Available in single-phase models, and in capacities ranging from 2 through 4 tons.
- Uses common roof curbs and is easily adaptable to either down discharge or side discharge to accommodate almost any installation requirement.

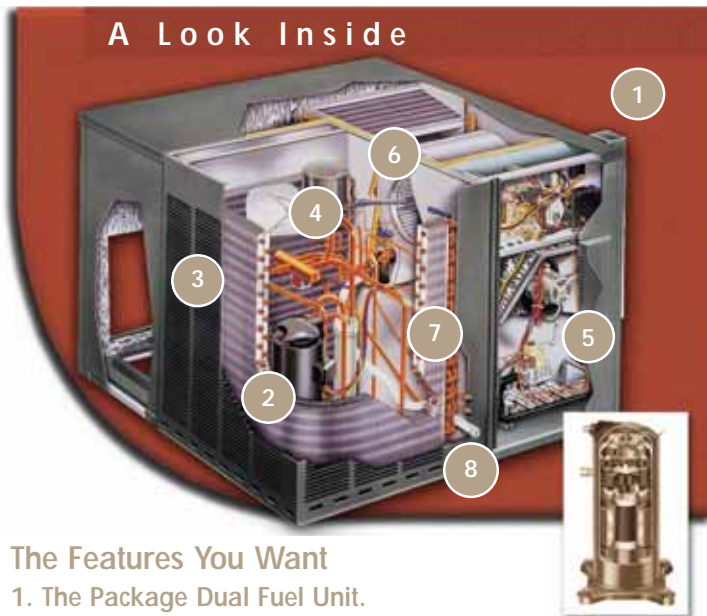

Quality That Endures

Rheem *Classic*® Series 14 SEER Package Dual Fuel Units combine money-saving efficiency, whisper-quiet operation, environmental-friendliness and superb performance to bring you peace of mind – year after year. Nothing performs more dependably than a Rheem Package Dual Fuel Unit.

It's that simple.

A Look Inside

The Features You Want

1. The Package Dual Fuel Unit.

The Package Dual Fuel Unit is a package heat pump with a gas furnace installed in the heat section instead of electric heat that a standard package heat pump features. This hybrid package system allows for both comfort and energy savings by utilizing the electric heat pump for warmth, except in colder periods, which is when the gas furnace would take over to assure maximum comfort and energy savings.

2. The Scroll® Compressor.

All of our residential package units – regardless of efficiency level – feature the Scroll Compressor. The scroll compressor uses a more advanced technology than traditional reciprocating compressors. They have fewer moving parts, and they are quieter, more efficient, and longer lasting.

3. Durable Cabinet with Louvered Condenser Compartment.

Our cabinets have a powder painted finish that protects them from the harshest weather extremes. And our louvered condenser compartment is the best in the industry for protecting the condenser coil against yard hazards and weather extremes.

4. Grille/Fan Motor Mount. Our motor mount helps protect the fan motor from the elements for longer life. Its design dependability helps reduce vibration and noise.

5. Furnace Compartment. Located inside the easily accessible furnace compartment is the control box, draft inducer motor, in-shot gas burners, the gas valve and manifold. Control box operational controls are “up front” for quick access and service diagnostics. The draft inducer motor is specially designed to quietly provide combustion air while simultaneously venting outdoors the combustion products from the furnace heat exchanger. In addition to the draft inducer motor, the in-shot gas burners, gas valve and manifold efficiently regulate the flow of gas for combustion. These new Package Dual Fuel Units also feature direct-spark ignition and remote flame sensors for added dependability and efficiency.

6. Matched Blower/Evaporator Coil Unit. The blower is responsible for the flow of air into your ductwork. It has been designed to match the evaporator coil and other system components for maximum efficiency and quiet operation. In addition, the coil features rifled copper tubing and enhanced fins for improved efficiency.

7. Tubular Heat Exchanger. Our new Package Dual Fuel Units feature a tubular stainless steel heat exchanger design. Tubular heat exchangers are more efficient and durable than older-style clamshell heat exchangers. The factory standard stainless steel heat exchanger is backed by a limited lifetime warranty in residential applications.

8. Service Fittings. Exterior service fittings enable a serviceman to quickly determine unit operating conditions.

Limited Warranty Information

All of our Rheem package units were developed with reliability and durability in mind. The Scroll® Compressor features a 10-year limited warranty on all single-phase models installed in residential applications. The factory standard Stainless Steel Heat Exchanger on a single-phase model installed in a residential application features a limited lifetime warranty. A twenty-year limited warranty is offered on factory standard Stainless Steel Heat Exchangers on single-phase models installed in commercial applications. All other parts have a conditional warranty of ten years for single-phase models installed in residential applications (Registration Required).

Protection You Can Count On

While your Rheem equipment is incredibly reliable and covered by an outstanding warranty, you can extend your warranty coverage with Protection Plus® extended service protection. Then you can relax and enjoy the comfort of your Rheem Package Dual Fuel Unit – without worrying about the cost of parts or labor for unexpected repairs. And when Protection Plus is purchased in conjunction with your contractor's maintenance program, you can enjoy the peace of mind that your equipment will be both maintained and repaired – as needed and without additional expense. Ask your contractor about the variety of Protection Plus plans now available. For more information, call 1-877-276-4294 or visit www.protectionplusonline.com.

KwikComfort® Financing

Ask your Rheem contractor about KwikComfort® Financing, the easy and convenient way to finance everything associated with your Rheem equipment – your original equipment, all subsequent service, Protection Plus extended service protection, and even the comfort options you might choose to add later.
