

Maintain C-1®

Inhibits the Growth of Microorganisms in HVAC Systems and Air Ducts

DESCRIPTION

BBJ Maintain C-1 for HVAC Systems controls and inhibits the growth of microorganisms – such as gram positive and gram negative bacteria, algae, and mold – in HVAC Systems and Ducts.

When used as directed, Maintain C-1 for HVAC Systems and Air Ducts controls contaminants, like mold and mildew that often cause poor Indoor Air Quality (IAQ) and "sick building syndrome" at the source – the HVAC system. These contaminants can spread which may cause odors, damage surfaces and secrete toxic byproducts to living and working areas. It also effectively treats coils against mold and mildew growth which can restrict air flow, allowing the system to operate more efficiently.

Concentrate available in 15 ounce and 5 gallon containers.

FEATURES

- EPA registered
- Registered for use while building is inhabited
- Controls and inhibits the growth of mold and mildew at the source
- Virtually eliminates musty odors and "dirty sock syndrome"
- Concentrated formula makes gallons of ready-to-use product

A 15 ounce container of BBJ Maintain C-1 makes 7.5 gallons of ready-to-use product.

SPECIFICATIONS

EPA Reg. No.:	67212-2
pH:	2.5-4.5
Appearance:	Blue Liquid
Odor:	Mild
Uses:	For controlling and inhibiting the growth of black mold, mildew and other biological agents

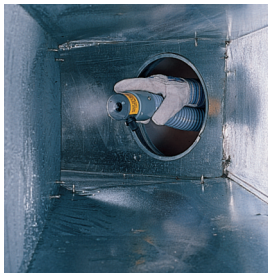

PACKAGING

Maintain C-1 for HVAC Systems and Air Ducts	Part #
15 oz Concentrated Bottle	480-12
5 gal Concentrated Bucket	481-01

ACTIVE INGREDIENTS

Water	Bronopol
Glycol ether	Citric acid
Coloring agent	

APPLICATIONS

HVAC SYSTEMS

Use Maintain C-1 on cooling coils, drip pans, air intakes, insulation, and other HVAC system surfaces to control and inhibit the growth of microorganisms.

SAFETY DATA: Keep out of reach of children. Refer to directions for specific instructions on use and safety precautions. Before using product carefully read label information and Material Data Safety Sheet.

RELATED PRODUCTS:

- **BBJ MMR II
MOLD & MILDEW REMOVER**

Combines a disinfectant and a cleaning agent to remove harmful mold and mildew. Use on surfaces such as HVAC vents, grilles, and other hard surfaces where microbial contamination may accumulate.

- **BBJ MICRO COIL CLEAN**

Safe and concentrated, non-caustic, non-corrosive biodegradable coil cleaner. Safe for use on both evaporator and condenser coils. Designed to be used with systems treated with BBJ Maintain C-1. Dilute 10 to 1.

- **BBJ FRESHDUCT**

Encapsulates and destroys odors on contact. Safe for use around chemically sensitive individuals. Comes ready-to-use, or as an economical concentrate. Dilute concentrate to 3 oz per gallon.

- **POWER COIL CLEAN**

Non-caustic, pH neutral, non-corrosive heavy duty coil cleaner that safely cleans and deodorizes HVAC coils and other dirty HVAC/R components without damaging metal surfaces like coils or fins.
