

ToughGard® R

Rotary Duct Liner

CertainTeed ToughGard® R stands out from other rotary duct liner products thanks to its outstanding cutability, acoustic and thermal properties, and its moisture-resistant airstream surface. Now, CertainTeed is pleased to reintroduce this product to the market as our sustainable ToughGard R. Available in most common coil line and standard widths, thicknesses and densities.

Cutability

Legendary ToughGard airstream surface and mat make hand or machine cutting easy. Minimal effort results in clean, crisp edges; facing won't pucker.

Quiet Operation

Absorbs unwanted crosstalk, equipment and air rush noises.

Thermal Performance

Thermal insulating properties help control condensation and lower HVAC operating costs by reducing heat gain/loss in duct systems.

Anti-Microbial Protection

The durable, black airstream surface is water repellent and contains an EPA-registered antimicrobial agent to reduce the potential of microbial growth.

Deca-BDE Free

Meets industry flame and smoke index performance standards without the use of deca-BDE, a chemical of concern, formerly used as a flame retardant.

GREENGUARD Gold Certification

Meets the most stringent GREENGUARD Gold standards for low chemical emissions into indoor air during product usage.

NOTE: 1/2" ToughGard R is available only with a black phenolic binder.
