

The Smart Choice for Air Filtration

A+2000

Permanent Air Filter

The A+2000 Permanent Air Filters are truly quality products, built to last a lifetime. The A+2000 Filters are designed to provide a balance between adequate air flow and filtration. Unlike many other permanent air filters the A+2000 does not rely on foam or porous pads that may clog or deteriorate for it's filtration. The secret behind the A+2000's performance is its' patented stage loading design, which allows it to capture progressively smaller particles with each layer.

The A+2000 Filters are MERV 8 rated according to ASHRAE 52.2 standards.

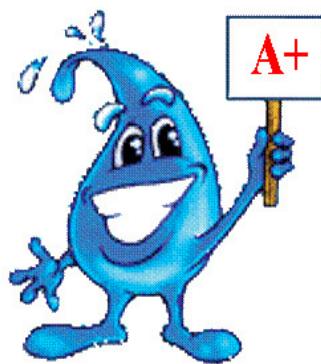

FILTERS FOR LIFE

A+2000 Filters are the only filters with an unconditional lifetime guarantee for the original purchaser.

Moving? FMI will resize the customers filter for a small fee of \$12.95 + shipping

CLEANS EASILY

Cleans easily and effectively - No oil sprays or expensive cleaners required! And not foam to clog or deteriorate - Just rinse with water and re-use.

INCREASED PROFIT

The A+2000 is a quality product that cannot be purchased at retail giants. There is no minimum order, it is available in standard and non-standard sizes, and we offer direct shipments to your customer at no additional charge.
