FUJITSU MINI-SPLITS: YEAR-ROUND, WHOLE-HOME OR BUSINESS ENERGY EFFICIENT HEATING AND COOLING

WHAT IS A MINI-SPLIT?

Halcyon systems eliminate the need for a basement or attic-located evaporator unit and bulky ductwork by using thin copper tubing that pumps refrigerant directly to discreet wall mounted or concealed units inside. Even more remarkable, this same unit works in reverse in winter, absorbing heat from the outside air and moving it indoors to heat your home. The result? Efficient cooling and heating for year-round, whole-house comfort in most climates.

Available in numerous mix-and-match capacities and configurations, there's a Halcyon mini-split system for even the most difficult to heat and cool areas.

HOW DOES A MINI-SPLIT WORK?

Like your refrigerator, heat pumps use electricity to pump refrigerant and transfer heat from one space to another. When we transfer heat from within our home to the outdoors, we call it "air conditioning". Conversely, when we transfer heat from the outdoors to within the home, we call it a "heat-pump".

HEAT PUMPS PROVIDE HEAT WHEN IT IS COLD

Because refrigerant is naturally much colder than outdoor temperatures even on a very cold day, it actually absorbs heat from outdoors, and transfers the heat it absorbs outside to within your home. The refrigerant's physical properties do this naturally. We use efficient compressors to pump refrigerant via small copper tubing from outdoors to indoors. Because we move the heat rather than create it (as electric baseboard or resistant heat does), we can deliver up to 4 times the heat for the energy we consume as baseboard heat!

AIR CONDITIONERS PROVIDE COOLING WHEN IT'S WARM

Come spring and summer, simply reverse the process and put the same system into "cooling mode" and transfer heat from indoors to the outside. For many climates, the advanced technology that goes into these units creates a far more cost effective alternative to either gas or oil-fired units for heat, or a central ducted system for air conditioning. Fujitsu's full mini-split line up are heat pumps, which provide both heating and cooling.

ELECTRIC HEATERS VERSUS HEAT PUMPS

An electric heater converts electricity directly to heat, and if we assume that the heat loss is zero, the output from one kilowatt input is one kilowatt or 3,400 BTU and the EER is 3.4.

Heat pumps are more efficient than some other forms of heating because heat pumps do not actually create heat - they just move it from one place to another. For example, the output of an efficient 10 EER heat pump is almost triple that of an electric heater.

*EER (Energy Efficiency Rating) = Rated BTU capacity divided by total kW input.

INDIVIDUAL ZONING: PERSONALIZED WHOLE-HOME COMFORT

Halcyon Systems are some of today's most advanced forms of heating and air conditioning. One outdoor unit can operate up to 5 indoor units simultaneously. Fujitsu's Systems are super quiet as well as highly energy efficient.

- **HFI** - This symbol denotes indoor units that can be used in single OR multi-zone applications
- Each indoor unit can be operated independently via remote control
- Choose from a variety of indoor unit styles
- Provide both heating and cooling (not simultaneously)
- High energy efficiencies
- Quiet operation

WALL MOUNTED

They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.

- Quiet operation
- Easy maintenance
- High delivered efficiency means lower utility bills

Shown here is a 3-zone system using outdoor unit AOU36RLXFZ1.

SLIM DUCT

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

FLOOR MOUNTED

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery and help those cold feet.
- Designer wireless remote control

COMPACT CASSETTE

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

A SOLUTION FOR ALL OF YOUR COMFORT NEEDS

DUCTLESS TECHNOLOGY

Don't waste money cooling and heating the ducts in your walls and attic. Fujitsu systems are ductless, meaning they install easily and won't take up valuable closet space. Since mini-splits have little to no ducting, they forego those energy losses typically associated with central forced-air systems. Duct losses in a central air system can easily account for more than 30% of energy consumption, especially if the ducts are not sealed tight or in an unconditioned space such as an attic or crawlspace.

CENTRAL AIR SYSTEM VERSUS FUJITSU QUAD ZONE

Thick black lines represent ducts of a central air system.
Red lines represent mini-ducts of a Fujitsu Quad Zone Slim Duct System.

WHOLE HOME OR BUSINESS COMFORT

Fujitsu's Halcyon systems provide home and business owners just the right amount of heating and cooling needed by installing 2 to 5 indoor units connected to one outdoor unit. Indoor units vary by size and style and each creates its own "zone" of comfort, allowing you to heat or cool individual rooms, hallways and open spaces.

A YEAR ROUND SOLUTION

Revolutionary Halcyon heat pumps provide both heating and cooling for year round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

OTHER APPLICATIONS

The 30RLXEH is specially engineered for spaces which require constant cool temperatures year round, and/or rooms that hold a large number of people (meeting spaces, classrooms, conference rooms).

ENERGY EFFICIENT: THE SMART CHOICE IN COMFORT

As much as half of the energy used in your home goes to heating and cooling. So, making smart decisions about your home's heating and air conditioning system can have a big effect on your utility bills – and your comfort.

WHERE DOES MY MONEY GO?

The high energy efficiencies of Halcyon systems slash utility bills by up to 25%. If your average annual utilities are \$4,200, Fujitsu can save you up to \$1,050 annually or \$10,500 in 10 yrs!*

*Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system.

REBATES

To encourage customers to buy energy efficient products, many local utility companies offer significant rebates for the purchase of a ductless mini-split system. Go to Fujitsu's web site to search for local rebates and consumer loans. We provide a listing of rebates and offerings on qualifying Fujitsu mini-splits by zip code.

www.fujitsugeneral.com

ENERGY STAR® QUALIFIED SYSTEMS

If your HVAC equipment is more than 10 years old or not keeping your house comfortable, you should have it looked at by a professional HVAC contractor. If it is not performing efficiently or needs upgrading, consider replacing it with a unit that has earned ENERGY STAR®. Installed correctly, these high-efficiency heating and cooling units can save up to 25% on heating and cooling costs.

Fujitsu has 39 systems that are ENERGY STAR qualified in 2019. See the lineup chart on pages 18-19 for a full listing of all ENERGY STAR® qualified systems.

COMFORT AND CONVENIENCE

FLEXIBLE AND QUIET

Mini splits offer flexibility because they can be suspended from a ceiling, mounted flush behind a drop ceiling, hung on a wall or floor-standing. Ductless heat pumps allow for a peaceful inside environment by enabling the contractor to install components like compressors and motors outdoors.

CONSTANT COMFORT THROUGH INVERTER TECHNOLOGY

Inverter technology is like cruise control for your heating or cooling system. Compressors only run as fast as they need to handle the cooling or heating demand. They can handle greater extremes in temperature, are smoother and more stable in operation, and reach the desired temperature more quickly than conventional air conditioners.

Inverter Benefits

- More heat at lower outdoor temperatures
- Lower RPMs = quieter operation
- Desired temperature in half the time
- Up to 30% more efficient
- Stable temperature

Conventional System

Inverter System

USER FRIENDLY CONTROL

Fujitsu is using ergonomics to expand the use of user friendly designs such as easy-to-read large LCD displays, easy-to-operate buttons, and displays with easily recognizable colors and icons. We are producing control systems that provide greater convenience for both individual and centralized control with operability suitable for the application.

Optional Wired Remote
UTY-RNRUZZ

Standard Wireless Remote for select systems

APPLICATIONS

WHERE CAN MINI-SPLITS BE USED?

- Convenience stores
- Fast food chains
- Fire houses
- Police stations
- Bars
- Sunrooms and additions
- Warehouses
- Nursing homes
- Small offices
- Older homes
- New construction homes
- Schools
- Places of worship
- Hospitals and medical facilities
- Restaurants
- Computer rooms
- Hotels and motels
- ATM vestibules
- Server rooms

JUST ABOUT ANY PLACE THAT REQUIRES COMFORT!

FGLair® APP

Control your home's climate anytime, anywhere!

Access control functions remotely from any smartphone or tablet.

WALL UNIT

SLIM DUCT

FLOOR UNIT

CEILING CASSETTE

MEDIUM STATIC DUCTED

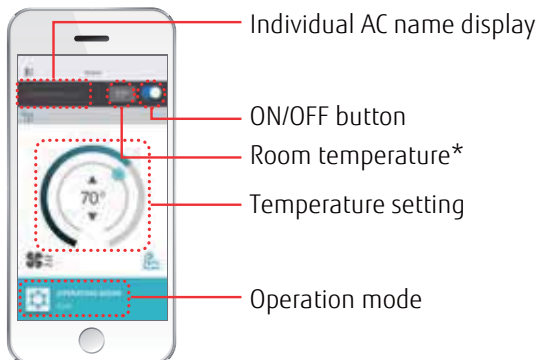

LARGE CASSETTE

USER FRIENDLY INTERFACE

User friendly screen display facilitates easy operation.

*Only applies to RLS3Y units and UTY-TFSXZ2. Feature not available with Wi-Fi module (UTY-TFNXZ2).

Control up to 24 systems using a single free account.

MAIN FUNCTIONS

- ON / OFF
- Operation mode
- Fan speed
- Louver position
- Set temperature control
- Weekly timer
- Minimum heat
- ESP function
- Error display
- Email notification

VOICE CONTROL FOR YOUR FUJITSU HALCYON SYSTEM USING AMAZON ECHO OR GOOGLE HOME

Any FGLAir compatible Fujitsu Halcyon system can be voice controlled with Amazon Echo or Google Home speakers.

EXTRA LOW TEMPERATURE HEATING - XLTH

NOT ALL HEATING SYSTEMS ARE CREATED EQUAL

Without the right technology, a system won't work when its needed most.

PROTECTION FROM WINTERS' COLDEST TEMPERATURES

When the temperature drops you don't want to be left in the cold. It's important to choose a heat pump system rated for the climate you live in. If your system doesn't operate in severe conditions you and your family could be left without any heat at all.

Fujitsu's line of mini-split heat pumps come in different sizes, styles, and rated outdoor temperatures. The Extra Low Temperature Heating (*XLTH*) Series features outdoor condensing units engineered to operate in temperatures down to -15°F.

HIGH PERFORMANCE HEATING

Fujitsu XLTH units feature large heat exchangers and high capacity compressors. This gives our XLTH heat pumps the ability to extract heat even at very low outdoor temperatures. For example, at an indoor setpoint of 70°F, all RLS3YH and RLFFH models can deliver 100% or more of their rated heating capacity down to 3°F. All XLTH models also offer superior heating performance down to -15°F outdoor temperatures.

Fujitsu XLTH systems do not have a low temperature lockout, continuing to heat even below -15°F as conditions allow.

METAL FAN GUARD

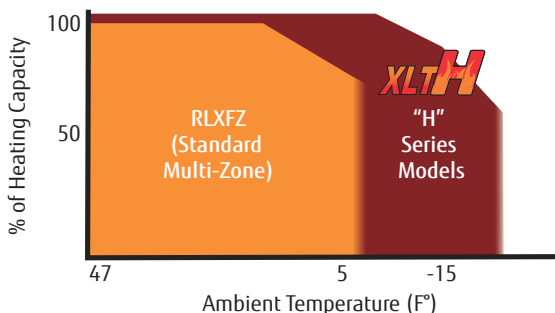

While other models have a plastic fan guard, XLTH models use metal, which is most capable of withstanding the colder elements.

Without the right technology, condensate freezes to the bottom of the unit and reduces its efficiency and heating output.

IMPROVED HEATING CAPACITY

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

BASE PAN HEATER

- Equipped with a heater that prevents condensate from freezing
- Contoured base design discharges melted water through drain holes.
- Without a heater, freezing condensate can cause noise, damage to fan blade, condenser, and system performance.

FEATURE EXPLANATION

ENERGY SAVING

SEER

Seasonal Energy Efficiency Rating. Used to express efficiency of an AC or Heat Pump. A higher rating means more efficient.

HSPF

Heating Seasonal Performance Factor, measures the efficiency of heating portion of your heat pump.

Economy Mode

Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.

Energy Saver

Keeps room cool enough for comfort by using a relaxed thermostat setting reducing power consumption.

Energy Saving Program (ESP)

If a space is left without turning the unit off, ESP knows that it is unoccupied and 20 minutes later, temperature is adjusted accordingly until users return to the room. Function is not available in multi-zone installations.

ENERGY STAR® Qualified

Qualified products and practices help you save money and reduce greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the U.S. Department of Energy.

Minimum Heat Mode

Sets room temperature to 50°F, keeping temperatures above freezing and reducing power consumption.

COMFORT

Auto Changeover (heating to cooling or vice-versa)*

Automatically alternates between heating or cooling if the room temperature falls 4°F below the set temperature when cooling or rises 4°F above set temperature when heating.

Auto Fan Mode

System starts in high fan speed and automatically adjusts downward as room begins to reach set temperature.

Auto Louver: 4-Way

Redirects airflow automatically with up/down and left/right motion.

Auto Louver: Up/Down

Redirects airflow automatically with seven position up and down motion which can be set to auto swing.

Auto Restart

Following a power failure, systems will automatically restart in the same operating mode as before, once power has been restored.

Dry Mode

This mode gives priority to reducing the level of humidity in the room, in conjunction with lowering the temperature.

Fresh Air Intake

Outside air can be introduced by attaching field supplied flexible duct to fresh air knockouts.

Outdoor Unit Low Noise+

Limits compressor and fan speed during high speed operation for noise reduction purposes.

Powerful Operation

20 minutes of continuous operation at maximum airflow and maximum compressor speed. Rapid cooling and heating makes the room comfortable quickly.

Quiet Mode (Indoor Unit)

An extra quiet fan speed to make sure you are not disturbed.

+ Function is bypassed during defrost and at low speed operation. This feature may limit cooling/heating capacity during high/low ambient conditions and increase energy consumption as system may need to operate longer due to reduced compressor speed.

* Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

CONVENIENCE

24 Hour Timer

Allows for one on/off cycle during a 24 hour period.

Sleep Timer

Automatically adjusts the temperature while you sleep to make you more comfortable.

Weekly Timer

Allows you to set on/off time twice a day and a different on/off time by day.

PERFORMANCE

Apple Catechin Filter (polyphenol ingredient from apples)

Dust, mold spores and microorganisms are absorbed onto the filter by static electricity and growth is inhibited. 3 - 12 month life expectancy.

Cold Prevention

Indoor coil will warm prior to fan operating, preventing cold air during heating mode.

Expanded Heating Performance

Delivers 100% of rated heating capacity at +5°F (-15°C).

High Ceiling Mode

Temperature at the top of a high ceiling room may be warmer than the space occupied; this mode adjusts for this difference.

Ion Deodorizing Filter

Deodorizes by decomposing absorbed odors using the oxidizing and reducing effects of ions generated by fine ceramic particles. 3 year life expectancy. Wash to restore surface action.

Pump Down Operation

Collects all refrigerant in system back into the outdoor unit when the unit is to be moved or before servicing the refrigerant circuit.

Remote Temperature Sensor

Room temperature sensor is located in optional wired remote control only.

Third Party Device Control

Turns system on or off using a normally closed circuit. Interface with third party devices such as home automation.

0°F Low Ambient Cooling

Can operate in cooling mode with outdoor temperatures as low as 0°F. Operation outside of factory specification is not recommended.

-5°F Low Ambient Cooling

Can operate in cooling mode with outdoor temperatures down to -5°F. Operation outside of factory specification is not recommended.

INSTALLATION

Base Pan Heater

Prevents condensate from freezing on the outdoor unit.

Blue Fin Heat Exchanger

Blue fin treatment to the outdoor unit's heat exchanger improves corrosion resistance.

Branch Duct Capable

Systems are capable of attaching field-supplied branch ducts providing up to 38% of the cooling up to 16 feet away.

Built-In Condensate Pump

Integrated into the indoor unit.

Daisy Chain

Ability to connect up to 16 identical style indoor units to one wired remote.

Long Piping Length

Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

Slender Fit

Cassette body can be moved downward into the room 1-3/8" to accommodate limited ceiling space.

Standard Warranty

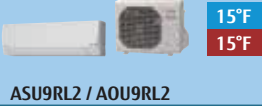

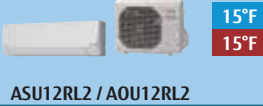

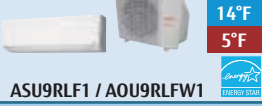

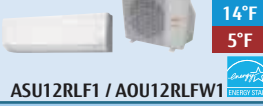

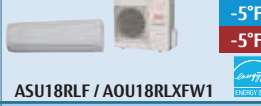

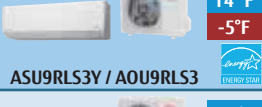

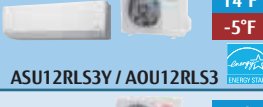

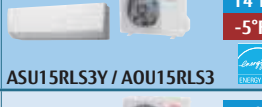

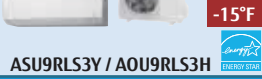

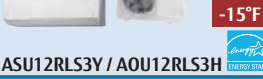

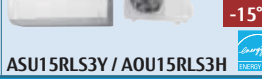

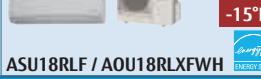

Fujitsu systems come standard with either a 6 Year Compressor / 2 Year Parts warranty or a 7 Year Compressor / 5 Year Parts warranty.

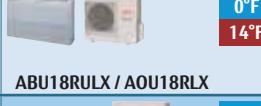

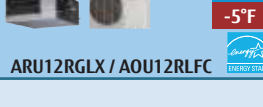

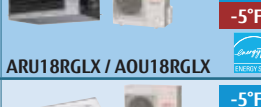

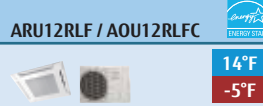

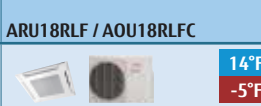

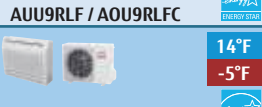

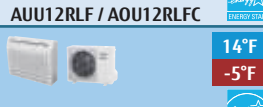

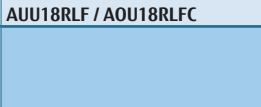

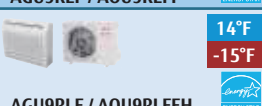

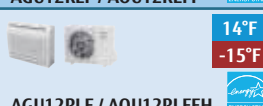

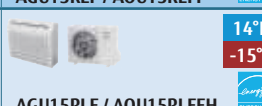

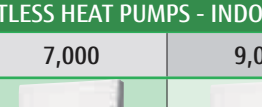

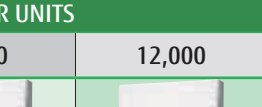

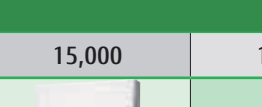

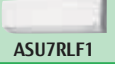

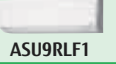

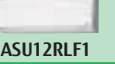

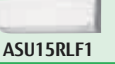

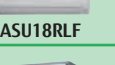

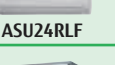

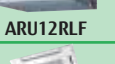

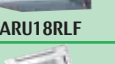

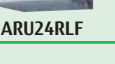

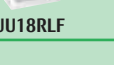

Extended Warranty

Additional info on page 71. See full product warranty for details.

SINGLE-ZONE MINI-SPLIT SYSTEMS

Making the hottest places cool and the coolest places more comfortable

- Extensive lineup from 9,000 to 48,000 BTU
- 38 different systems available in 7 indoor unit styles
- Energy efficient systems with SEER ratings as high as 33.0 and HSPF as high as 14.2
- 29 ENERGY STAR® qualified systems
- Inverter Technology is used in all systems
- All systems feature environmentally friendly R410A refrigerant
- Quiet operation with indoor units as low as 21dB and outdoor units as low as 47dB

9, 12, 15,000 BTU_h WALL MOUNT HEAT PUMPS

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
 2 Available only with optional wired Remote Control and optional interface kit.
 3 Available only with optional interface kit. Operation monitoring and On/Off control only.
 4 XLTH models only

ENERGY SAVING PROGRAM

These Halcyon systems know how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it. This feature can be deactivated if chosen.

HIGH PERFORMANCE HEATING

The RLS3Y model can operate down to -5°F. The RLS3YH can operate down to -15°F. See the full **XLTH** story on page 14.

BUILT-IN WI-FI

Remotely operate your heating and cooling system using a smartphone as a remote control. Details on page 12.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM
- Wired Remote Control: UTY-RNNUM
- Simple Remote Control: UTY-RSNUM

9 AND 12,000 BTU_h WALL MOUNT HEAT PUMPS

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
 2 Available only with optional wired remote control.
 3 Available only with optional wired remote control and optional interface kit.
 4 Available only with optional interface kit. Operation monitoring and On/Off control only.
 5 See page 13 for details.

BUILT IN FILTRATION

LONG-LIFE ION DEODORIZATION FILTER
 The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

APPLE-CATECHIN FILTER
 Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated. Filter lasts 3-12 months.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM*
- Wired Remote Control: UTY-RNNUM*
- Simple Remote Control: UTY-RSNUM*
- Wi-Fi Interface Module: UTY-TFNXZ2*
- Dry Contact Wire Kit: UTY-XWZXZ5
- Interface Kit: UTY-XCBXZ2

* Wall mounted ASU9, 12RLF1 require accessory interface kit #UTY-XCBXZ2 in order to connect these devices to them.

30,000 BTU_h WALL MOUNT HEAT PUMP

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.

2 Available only with optional wired remote control.

3 Available only with optional Interface kit.

4 See page 13 for details.

EXTENDED LINESET

Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

MAX PIPE LENGTH
System 30RLXEH
246 ft. (75m)

Max Height Diff.
98 ft.
(30m)

LEAD-LAG FUNCTION

Lead-lag function provides a redundant cooling system by pairing two 30RLXEH systems together delivering a unique solution for many applications.[^]

Lead-lag function provides the following operation modes:

- Alternative Operation – units alternate operation, so neither unit is running at the same time.
- Emergency Operation – if an error occurs on one unit, the second unit will turn on.*
- Supporting Operation – if the setpoint cannot be reached with one unit alone, the second unit will come on to satisfy the demand for cooling.

LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or home owner.

HIGH PERFORMANCE HEATING CAPACITY

The RLXEH model can operate down to -15°F. See the full **XLTH** story on page 14.

ADDITIONAL APPLICATIONS THAT MAY REQUIRE LOW AMBIENT COOLING:

- Conference/Meeting/Training Rooms
- Social Gathering spots
- Places of Worship

OPTIONAL ACCESSORIES

- Wi-Fi Interface Module: UTY-TFSXZ2
- Wired Touch Panel Remote Controller: UTY-RNRUZ2[^]
- Wired Remote Control: UTY-RVNUM[^]
- Wired Remote Control: UTY-RNNUM[^]
- Simple Remote Control: UTY-RSNUM[^]
- Dry Contact Wire Kit: UTY-XWZX
- Interface Kit: UTY-XCSXZ1
- Interface Kit Box: UTZ-GXXB
- Outdoor Unit Input/Output Connector: UTY-XWZXZ3

[^] Wired remotes cannot be used when using this feature.
This includes UTY-RNRUZ2, UTY-RVNUM, UTY-RNNUM, UTY-RSNUM.

* Power loss to one of the two units will disengage the lead lag function.

HIGH-HEAT SYSTEM 30RLXEH

30RLXEH

UP TO 18.7 SEER

The 30RLXEH is specially engineered for applications that require constant cool temperatures year round, and/or rooms with large heat loads such as classrooms and conference rooms.

9 AND 12,000 BTUh, 115V, WALL MOUNT HEAT PUMPS

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in residence. See full warranty for details.
 2 See page 13 for details.

FUNCTION

Stylish, slim and elegant, these popular wall mounted units are designed for single rooms. Indoor units have a clean, aesthetic design and are small but mighty and shorter in length than competing units, helping them blend into any room.

EASY MAINTENANCE

Front panel is easily removed for cleaning.

APPLICATIONS

This category of equipment is ideal for smaller spaces where spot cooling or heating is required. Residential applications including sunrooms and additions are made easier with these 115 volt heat pumps. Do you have a warm or cool spot in your home? Fujitsu mini-splits can provide extra cooling or heating capacity for those hard to cool areas. Commercially, their small size makes them ideal for small offices, providing individual temperature control.

18, 24, 30, 36,000 BTUh WALL MOUNT HEAT PUMPS

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
 2 Available only with optional wired remote control.
 3 Available only with optional Interface kit.
 4 RLXB models only.
 5 See page 13 for details.

FUNCTION

Stylish, slim and elegant, these wall mounted ductless heat pumps are designed for single rooms. Ideal for spaces requiring additional capacity but are limited on space. With more efficient zone control, ductless mini-splits are perfect for renovations, restorations, conversions, and add-ons.

LOCK OUT FUNCTION

This feature is set by the contractor on behalf of the Commercial Property Owner to prevent either Cooling or Heating operation from occurring. This is not a function that can be set by a tenant, user, or home owner.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM
- Wired Remote Control: UTY-RNNUM
- Simple Remote Control: UTY-RSNUM
- Dry Contact Wire Kit: UTY-XWZX
- Wi-Fi Interface Module: UTY-TFNXZ2

9, 12, 15,000 BTU_h FLOOR MOUNT HEAT PUMPS

1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
 2 Available with optional wired remote control.
 3 RLFFH models only.
 4 See page 13 for details.

IDEAL RADIATOR REPLACEMENT

At less than 24" high and 30" wide, floor mount models fit easily under a standard window and can replace a radiator twice its size while producing more capacity.

BASE PAN HEATER (RLFFH MODELS)

RLFF models can operate down to -5°F. RLFFH models can operate down to -15°F. See the full *XLTH* story on page 14.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM
- Wired Remote Controller: UTY-RNNUM
- Simple Remote Control: UTY-RSNUM
- Dry Contact Wire Kit: UTY-XWZXZ5
- Wi-Fi Interface Module: UTY-TFNXZ2

TWO FANS AND WIDE AIRFLOW

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in "Upward Airflow Only" when occupants wish not to have feet warmed or cooled.

Cooling		
Heating		Window

1. Upon startup, both top and bottom louvers open.
 2. As the room temperature nears the setpoint, only the top louver stays open to help prevent cold air from falling.

1. Upon startup, both top and bottom louvers open.
 2. Closer to setpoint, only the top louver stays open to help prevent cold drafts from windows.

9, 12, 18,000 BTU_h COMPACT CASSETTE HEAT PUMPS

Compact Cassette Grille UTG-CCGF shown is sold separately and must be ordered with each compact cassette.

- 1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
- 2 Available only with optional wireless remote control.
- 3 Requires Fujitsu's Optional Fresh Air Kit part #UTZ-VXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2"W.C. or 90 CFM at .4"W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.
- 4 Available only with optional Interface kit. Operation monitoring and On/Off control only.
- 5 See page 13 for details.

FUNCTION

The compact and stylish design of the cassette grille fits perfectly into a standard 24" square ceiling grid, with no overlapping of adjacent ceiling tiles. Features include high efficiency up to 24.0 SEER, heating at low temperatures down to -5°F, compact design, quiet operation, a standard wired remote control, and the ability to bring in fresh air through the optional Fresh Air Kit.

FLEXIBLE INSTALLATION

Since this panel fits into the ceiling grid, it can be installed in various locations. For example, you can install it next to recessed ceiling light fixtures.

CONSISTENT AIRFLOW DISTRIBUTION

The louver design maintains uniform room temperature by evenly spreading air throughout the space.

The new design spreads airflow evenly and widely across a space, helping to maintain consistent temperatures.

QUIET OPERATION

Optimization of wing form (laminar wing design) and number of wings (7 blades) enables as low as 27 dB.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM
- Wireless remote UTY-LNHUM
- Fresh Air Kit³ UTZ-VXAA
Mixes room air which then passes through the heat exchanger.
- Wi-Fi Interface Module: UTY-TFNXZ2

Pump	16 Daisy	WI-FI CAPABLE	<p>1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details. 2 Available only with optional wireless remote control. 3 Available only with optional Interface kit. Operation monitoring and On/Off control only. 4 See page 13 for details.</p>										

FUNCTION

Slim ducts provide cooling or heating for small room applications such as offices, restaurants, convenience stores, motels, dorms, in retrofit and new construction. Long maximum combined piping length of 66' and 49' in height allow for versatile installations. Either horizontal or vertical flexibility and low height enables compact soffit or cabinet installation.

SLIM DUCT

Built-in drain pump allows for installation of slim duct unit in smaller spaces than traditional units.

RETURN AIR-INTAKE CHOICES

FLEXIBLE INSTALLATION

Unit can be placed horizontally or vertically. However, internal drain pump will not operate when the unit is mounted in a vertical configuration.

OPTIONAL ACCESSORIES

- Wired Remote Control: UTY-RVNUM
- Wireless Remote and Receiver UTY-LRHUM
- Auto Louver Grille Kit UTD-GXSA-W (for ARU7/9/12)
UTD-GXSB-W (for ARU18)
- Wi-Fi Interface Module: UTY-TFNXZ2

FIELD SUPPLIED FILTERS USED WITH SLIM DUCT UNITS

Although Slim Duct units come with factory filters, when return ductwork is used field supplied filters are more practical to use. They can be installed at the unit or for more convenient servicing, in filter grilles. See the guidelines to the right to determine filter sizes.

The chart includes CFM, external static pressure capability and a typical filter size for each model. Filters are sized to keep velocities and static pressure loss low. This will ensure sufficient static pressure is available for ductwork, fittings and supply and return grilles.

Alternative filter sizes with equivalent face areas can be used. After deducting filter loss, available static pressure values are shown.

A fiberglass filter is shown in blue to the left. A MERV 8 pleated filter is shown in white.

FUNCTION

Fujitsu is proud to introduce the newest addition to our single-zone mini-split lineup – three new Medium Static Pressure Duct indoor units! These units use the same energy efficient inverter technology you expect from Fujitsu mini-split products, and they have enough static pressure to heat or cool a whole house. SEER ratings up to 21.3 and a compact size mean these indoor units can find a place in many applications.

ENERGY EFFICIENT & QUIET OPERATION

The combination of the V-shaped heat exchanger, air stabilizer, and the energy efficient DC fan motor results in high efficiency and quiet operation.

FEATURE HIGHLIGHTS

- Static pressure up to 0.80" W.G. (12/18/24/30/36k models)
- Max piping lengths of up to 246 feet (42/48RGLXD systems)
- Medium Static Ducted units must be installed horizontally
- Heating and cooling operation rated down to -5°F outdoor temperature
- Multiple control options available
- Built-in drain pump
- Automatic static pressure detection for install conditions
- Bottom or rear return air intake options
- Anti-corrosive coil coating on outdoor unit

Note: Indoor unit will NOT include any wireless or wired controllers in the box. Given that the medium-static RGLX unit is compatible with multiple control options the customer now has the option to choose the controller that best suits their needs.

* 12, 18, 24,000 BTUh models fan speed: Quiet

OPTIONAL PARTS

- Wired Remote Controller: UTY-RNRU22
- Simple Remote Controller: UTY-RSRY, UTY-RHRY
- Thermostat Converter: UTY-TTRX
- Wi-Fi Interface Module : UTY-TFSXZ2
- IR Receiver Unit: UTY-LBTUM
- Remote Sensor Unit: UTY-XSZX

18, 24, 36,000 BTUH CEILING & UNIVERSAL HEAT PUMPS

1 Available only with optional wired remote control.
 2 Fresh air knockout available. Fresh air fan and ductwork field supplied. See Design and Technical Manual for details.
 3 See page 13 for details.

APPLICATIONS

The universal floor/ceiling mount 18RULX and 24RULX are ideal for a house of worship to mount beneath stained glass windows. Lower in height than the pews, they do not disturb the aesthetics of the space. With long piping lengths of 165' the outdoor units can also be placed remotely out of sight. Another popular application for this model is in hallways where wall space is limited. The 36RSLX is popular where fresh air intake and high capacity is required like a restaurant or bar. They are also often suspended from threaded rod and used in multiple to condition large warehouse spaces.

FUNCTION

The 18RULX and the 24RULX are universal mount. They can mount low on the wall or transverse mount them on the ceiling. The 36RSLX can only be mounted on the ceiling, can take in fresh air and can throw air farther.

OPTIONAL ACCESSORIES

- Wired Remote Control UTY-RNBYU*
 - Weekly Timer
 - Full Function Wired Remote
 - Child Lock Capable
- *Requires dip switch change on indoor unit.
- Condensate Pump UTR-DPB24T
 - OEM design plug and play
 - Rated for 11.8" of vertical lift.
 - Available only for System 36RSLX.

- 5 Available only with optional wired remote control.
- 6 Available only with optional Interface kit. Operation monitoring and On/Off control
- 7 See page 13 for details.

BETTER AIR DISTRIBUTION USING 360-DEGREE LOUVERS

Circular flow design allows conditioned air to reach every corner of a room.

INDIVIDUAL LOUVER CONTROL

Each louver can be set individually to deliver comfortable air exactly where you want it in any room configuration. To take advantage of this feature use Wired Remote Control (Touch Panel) UTY-RNRUZZ.

Individual louvers can be programmed separately. Adjust vertical airflow and louver position with UTY-RNRUZZ Wired Remote Control.

Airflow fan speed can be customized depending on room layout.

QUIET OPERATION AND 4 FAN SPEED CONTROL

With the new airflow structure, sound levels are drastically reduced. Circular flow cassette models operate at whisper quiet sound levels. Choose from 4 different fan speeds.

*Compatible Remote Controller is as follows:
UTY-RNRUZZ / UTY-RSRY / UTY-RHRY / UTY-LBTUC

HIGH ENERGY EFFICIENCY

Energy saving performance is achieved by DC twin rotary compressor, DC fan motor and optimal refrigerant cycle control.

SEER (24k BTUh model)

HSPF (24k BTUh model)

18,000 BTUh and 24,000 BTUh models are Energy Star qualified.

RECOMMENDED ACCESSORIES

NOTE: RGLX Large Cassette grilles are sold separately.

Circular flow cassette grilles come in your choice of either black or white.

UTG-LCGVCB

UTG-GCGF

NOTE: Wired Remote Control sold separately.

RGLX Large Cassettes are compatible with UTY-RNRUZZ 2-wire controls.

Thermostat Converter - UTY-TTRX - Control your Fujitsu heating and cooling system with your favorite smart thermostat (not included).

Wi-Fi Module - UTY-TFNXZ2 - Add wireless capability to your Fujitsu system through FGLair. Cannot be installed in conjunction with Wired Remote Controls.

IR Wireless Module - FJ-IR-WIFI-1NA, Wired Module - FJ-RC-WIFI-1NA - The IR Wireless and Wired Modules work with the IntesisHome® app (sold separately).

MULTI-ZONE MINI-SPLIT SYSTEMS

- Operate as few as one indoor unit or all indoor units
- Choose from 4 indoor unit styles - wall mount, slim duct, compact cassette, and floor mount
- Many combinations are ENERGY STAR® qualified
- Create hundreds of combinations based on indoor type and BTUh

MULTI-ZONE

- Connect 2 to 5 indoor units, depending on model
- Connect 14,000 to 54,000 BTUh
- No branch boxes or separation tubes required

MULTI-ZONE EXTRA LOW TEMPERATURE HEATING

18, 24, 36,000 BTUh

- Connect 2 to 4 indoor units, depending on model
- Connect 14,000 to 39,000 BTU
- eXtra Low Temp Heating down to -15°F outdoor temps
- No branch boxes or separation tubes required

YEAR-ROUND, WHOLE HOME OR BUSINESS COMFORT

Halcyon Systems are some of today's most advanced forms of heating and air conditioning. Multi-zone outdoor units can operate from 2 to 5 indoor units simultaneously. Fujitsu's systems are super quiet as well as highly energy efficient.

MULTI-ZONE AND XLTH SERIES SYSTEMS 18, 24, 36, AND 45,000 BTUH

AOU36RLXFZH

CONNECTABLE CAPACITY

This allows connectable indoor units' total capacity to exceed outdoor unit capacity. See Allowable Combination Table on page 62.

If all indoor units are cooling or heating at the same time, the system will limit their capacity so that their total matches the outdoor unit's capacity. When a zone meets a desired set temperature it requires less capacity. The unused capacity is then distributed to the remaining indoor units, increasing their capacity.

FOR EXAMPLE

The load on a 3-bedroom home with a living room and kitchen downstairs and 3 bedrooms upstairs is 39,000 BTUH (21,000 BTU downstairs and 18,000 BTU upstairs). However the family isn't upstairs and downstairs at the same time, therefore not all units will be running simultaneously allowing 100% heating or cooling to occupied spaces. This can be achieved by our AOU36RLXFZ1 outdoor unit.

MIX AND MATCH FLEXIBILITY

The ability to create the **right** combinations, the **right** quantity (up to 5-zones), the **right** style indoor units, and the **right** capacity. It's the **RIGHT** choice for your home or business.

MULTI-ZONE OUTDOOR UNITS

INDIVIDUAL ZONING: PERSONALIZED WHOLE HOME COMFORT

WALL MOUNTED

They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.

- Quiet operation
- Easy maintenance
- High delivered efficiency means lower utility bills

SLIM DUCT

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

COMPACT CASSETTE

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

FLOOR MOUNTED

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery
- Designer wireless remote control

7, 9, 12, 15, 18, 24,000 BTU_h WALL MOUNT

MULTI-ZONE INDOOR

ASU7, 9, 12, 15RLF1

ASU18, 24RLF

- 1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
- 2 Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.

- 3 RLF models only.
- 4 RLF1 models only.
- 5 RLF1 models: Available only with optional wired remote control.
- 6 Available only with optional wired remote control and optional interface kit.
- 7 Available only with optional interface kit.
- 8 Available only when used with Flex Zone AOU48RLXFZ1 outdoor unit.
- 9 See page 13 for details.

BUILT IN FILTRATION

LONG-LIFE ION DEODORIZATION FILTER

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

APPLE-CATECHIN FILTER

Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated.

7, 9, 12, 18, 24,000 BTU_h SLIM DUCT

MULTI-ZONE INDOOR

- 1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.
- 2 Available only with optional wireless remote control.
- 3 Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.
- 4 Available only with optional interface kit.
- 5 Available only when used with Flex Zone AOU48RLXFZ1 outdoor unit.
- 6 See page 13 for details.

FLEXIBLE INSTALLATION

Horizontal or vertical, though internal drain pump will not operate when the unit is mounted in a vertical configuration.

SLIM DUCT

Adaptable when ceiling cavity is small and there is no slope for drain.

FIELD SUPPLIED FILTERS

Filters are sized to keep velocities and static pressure loss low. This will ensure sufficient static pressure is available for ductwork, fittings and supply and return grilles. Alternative filter sizes with equivalent face areas can be used.

7, 9, 12, 18,000 BTU_h COMPACT CASSETTES

MULTI-ZONE INDOOR

- 1 Applies when properly registered AND installed by a Fujitsu Elite Contractor in residence. See full warranty for details.
- 2 Available only with optional wireless remote control.
- 3 Auto Changeover is not designed to provide rapid changes between heating and cooling operation or simultaneous heating and cooling. This feature is not recommended for systems with more than one indoor unit unless all indoor units have similar heating and cooling requirements and have similar temperature set points. If all indoor units have similar heating and cooling requirements and have similar temperature set points, auto changeover will work.
- 4 Requires Fujitsu's Optional Fresh Air Kit part #UTZ-VXAA. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2"W.C. or 90 CFM at .4"W.C. For fan static pressure requirements, see installation manual. Add hood, filter and duct losses for fan total static pressure requirements. Will add 4" to the height of the indoor unit.
- 5 Available only with optional Interface kit. Operation monitoring and On/Off control only.
- 6 Available only when used with Flex Zone AOU48RLXFZ1 outdoor unit.
- 7 See page 13 for details.

EASY MAINTENANCE

Maintenance is made simple by removing the ceiling panel next to the grille. Working on the cassette unit from an adjoining ceiling tile keeps disruption and construction costs down.

2-STAGE TURBO FAN

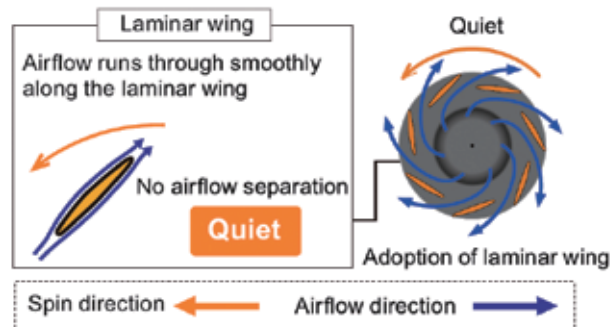

Air distribution is evenly spread across the heat exchanger by the 2 stage turbo fan which produces two separate airflow streams.

QUIET OPERATION

Optimization of wing form (laminar wing design) and number of wings (7 blades) enables as low as 27 dB.

Designed by CFD-analysis (fluid) simulations

OPTIONAL ACCESSORY

Fresh Air Kit

UTZ-VXAA

Mixes room air then passes through the heat exchanger. (see footnote #4, above)

18, 24, 36, 45,000 BTUH MULTI-ZONE OUTDOOR UNITS

Contractors can select either an 18, 24, 36 or 45,000 BTUH outdoor unit combined with wall mounted, slim duct, compact cassette or floor mount type indoor units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased. These systems are ideal for nursing homes, doctor's offices, condominiums, apartments and residences - any place where individual cooling or heating is needed.

COMPACT SIZE

The compact size of the outdoor units allows for many installation opportunities.

DC TWIN ROTARY COMPRESSOR

A high performance, low noise, large capacity DC twin rotary compressor is used.

SERVICE VALVES

AOU18RLXFZ / AOU24RLXFZ / AOU36RLXFZ1

The above units have service valves.

BENEFITS:

- **Installation** – It allows for a quicker and more productive install.
- **Service** – Allows for isolation.
- **Add Ons** – Ease of additional add-ons.

The AOU45RLXFZ does not have this feature.

*18+18 is the only 2 indoor unit (ASU, ARU or AUU) combination and requires K9FZ1818
¹See table for allowed combinations within this connectable capacity range.

Applies when properly registered AND installed by a Fujitsu Elite Contractor in a residence. See full warranty for details.

18, 24, 36,000 BTU_h XLTH MULTI-ZONE OUTDOOR UNITS

AMBIENT HEATING TEMPERATURE OF -15°F

Other models may go as low as -5°F, however they do not include a base heater and other advancements found in XLTH models. See the full **XLTH** story on page 14.

The base of Fujitsu's XLTH outdoor condensing units.

Base Heater

When temperatures reach 36°F, a built-in heater warms the base of the outdoor unit so that condensation doesn't freeze. Without a heater, freezing condensate can cause noise, damage to the fan blade, condenser, and system performance.

Base Drainage Holes

The contoured base design discharges melted water through many holes located at the bottom of the unit.

XLTH
18, 24,000 BTU_h

XLTH
36,000 BTU_h

IMPROVED HEATING CAPACITY

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

SERVICE VALVES

AOU18RLXFZH / AOU24RLXFZH

The above units have service valves.

BENEFITS:

- **Installation** – It allows for a quicker and more productive install.
- **Service** – Allows for isolation.
- **Add Ons** – Ease of additional add-ons.

The AOU36RLXFZH does not have this feature.

WHOLE HOME SOLUTIONS

18, 24, 36, 45,000 BTUH OUTDOOR HEAT PUMPS

- Connect 2 to 5 indoor units
- 58 to 120% connectable capacity
- Connect 14,000 to 54,000 total BTUh

Cool or heat one room, a few rooms or an entire home.

CHOOSE AN OUTDOOR UNIT:

Select either an 18, 24, 36 or 45,000 BTU/h outdoor unit combined with wall mounted, slim duct, compact cassette or floor mount type indoor units. Mix-and-match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application, whether it be hidden or showcased.

CHOOSE INDOOR UNITS:

1 If using UTY-RNBYU with these models you need to change the dip switch SW-1 to "ON". Refer to Tech Tip #028.
 2 Wall mounted ASU9, 12, and 15RLS3Y/RLS3YH require accessory interface kit #UTY-TWBXF1 in order

to connect these devices to them.
 3 Wall mounted ASU7, 9, and 12RLF1 require accessory interface kit #UTY-XCBXZ2 in order to connect these devices to them.

CONTROLS

Wired Remote Control

UTY-RNNUM*
UTY-RNBYU^
3-Wire

Group Control

The wired remote control with its unique lock function and sleek design provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Wired Remote Control

UTY-RVNUM
3-Wire

Group Control

Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Simple Remote Control

UTY-RSNUM
3-Wire

Group Control

Suitable when only basic operations are required for hotels, offices and other places where there is frequent arrival and departure of occupants. Remote does not allow any timer settings.

Simple Remote Control

2-Wire
UTY-RSRY

Group Control

Backlit 2-wire remote with built in temperature sensor. Offers set point adjustment in 1°F increments. Concentrates on basic functions such as Start/Stop, fan control, temperature setting and operation mode.

Simple Remote Control

2-Wire
UTY-RHRY

Group Control

Backlit 2-wire remote with built in temperature sensor. Offers set point adjustment in 1°F increments. Concentrates on basic functions such as Start/Stop, fan control, and temperature setting.

Wired Remote (Touch Panel)

UTY-RNRUZZ
2-Wire

Group Control

Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Wireless Remote Control

UTY-LNHUM

For spaces where there is just no place to mount the wired remote or where wireless operation is preferred.

Central Controller

UTY-DMMUM
3-Wire

This remote controls up to 5 individual indoor units. Set temperatures on timers to best meet individuals needs. Includes a large backlit LCD and 4-way navigation pad. Remote connects in daisy chain to branch boxes.

Remote Sensor

UTY-XSZX

Wall mounted room temperature sensor for slim duct models. Replaces room temperature sensor in the return when installed while still allowing for temperature correction.

Receiver Kit

UTY-LRHUM
3-Wire

For slim duct models. Includes a wireless remote control.

IR Receiver Kit

UTY-LBTUM

For medium static ducted units. Includes a wireless remote control.

IR Receiver Kit

UTY-LBTUC

For large circular flow cassettes. Includes a wireless remote control.

Group Control: With this feature, multiple evaporators can be 'daisy-chained' together on one single remote control, allowing for multiple single-zoned systems installed in an application to be grouped together by evaporator. The same feature can be used on a multi-zone system however, multiple multi-zone systems cannot be grouped together nor can a single-zone system be group controlled with a multi-zone system. For additional information, see Engineering Bulletin # 036 and/or 037.

^ Minimum Heat, Sleep Timer functions will be lost when the wired remote control is installed.

* Wall mounted ASU7, 9, and 12RLF1 require accessory interface kit (Part UTY-XCBXZ2) in order to connect this device to them. Wall mounted ASU9, 12, and 15RLS3/H require accessory interface kit (Part UTY-TWBXF1) in order to connect this device to them.

WI-FI DEVICES

See compatibility table, page 13.

IR Wireless Module

Model: FJ-IR-WIFI-1NA

Works with IntesisHome® app

Wired Module

Model: FJ-RC-WIFI-1NA

Works with IntesisHome® app

SAMPLE WI-FI APP SCREEN DISPLAYS

IntesisHome®

FGLair®

Wi-Fi Module

Model: UTY-TFNXZ2

Works with FGLair® app (Room temp DOES NOT display in FGLair app)

Wi-Fi Module

Model: UTY-TFSXZ2

Works with FGLair® app (Room temp DOES display in FGLair app)

ADDITIONAL CONTROLS

Network Converter

UTY-VTGX

The Network Converter is used to control and monitor one or more single-zone Halcyon indoor units (max of 16 IDU's per converter) through Airstage VRF Central Controllers.

Thermostat Converter

UTY-TTRX

Control Halcyon products¹ using a third party thermostat. Up to 16 indoor units can be connected as a group to one thermostat converter.

Modbus Converter

UTY-VMSX

Integrates single or multi-zone units into home automation systems.

¹ NOT compatible with models ABU18/24RULX, ABU36RSLX, AUU18/24/36/42RCLX.

INTERFACE KITS

Dry Contact Wire Kit²

UTY-XWZX/UTY-XWZXZ5

Turns system on or off using a normally open circuit. For example in home automation, BMS integration of only On/Off operation, occupancy sensor, key card switch, or lead-lag control of other heating/cooling devices. Will reduce capacity.

Interface Kit

UTY-XCBXZ2

Required to connect ASU7RLF1, 9RLF1, 12RLF1 and 15RLF1 to Wired Remotes UTY-RNNUM and UTY-RVNUM, Dry Contact Wire Kit UTY-XWZX, and Simple Remote Control UTY-RSNUM.

Interface Kit

UTY-TWBXF1

Required to connect the ASU9, 12, 15RLS3/H to Wired Remotes UTY-RNNUM and UTY-RVNUM, Dry Contact Wire Kit UTY-XWZXZ5, and Simple Remote Control UTY-RSNUM.

Slim Duct Connector Kit

UTD-ECS5A

Comes with 5 sets of wires. Can be used to turn unit on/off, wire in float switch, AUX heater, turn on an external device (Fan), or show if the unit is running.

Outdoor Unit Input/Output Connector

UTY-XWZXZ3

Gives the ability to limit the noise of the unit², stop the outdoor unit, limit power consumption², control the operating mode (Htg/Clg), or use output status to see if the compressor is running. You will need to order a kit for each option.

Outdoor Unit Base Heater Connector

UTY-XWZXZ4

Used to hook up an AUX base pan heater to the outdoor unit. Heater will stop ice from forming in the outdoor unit. Base heater will operate when outdoor temperature is below 36°F. Heater is field supply. Heaters greater than 25W can't be fed directly from the board, but have to be powered from another source.

Interface Kit

UTY-XCSXZ1

Required to connect ASU30RLE to Dry Contact Wire Kit UTY-XWZX3.

Interface Kit Box

UTZ-GXXB

Used to conceal Interface Kit UTY-XCSXZ1.

Human Sensor Kit

UTY-SHZXG

For large circular cassette.

External Connect Kit

UTY-XWZXZG

Used to connect with various peripheral devices and all A/C PCBs. For control output port.

External input and output PCB

UTY-XCSX

For RGLX units, use to connect with external devices and A/C PCB.

External input and output PCB Box

UTZ-GXRA

For large circular cassette. For installing the External input and output PCB.

External input and output PCB Bracket

UTZ-GXNA

For medium static ducted units. For installing the External input and output PCB.

²: Will reduce capacity

FRESH AIR INTAKE KITS

High Humidity Insulation Kit
UTZ-KXGC

Additional insulation for compact cassette units, which may be needed when they are installed in high humidity areas.

Fresh Air Intake Kit
UTZ-VXAA

Fresh air kit for AUU7-9-12-18RLF units. Mixes room air then passes it through a heat exchanger. Allows for a 4-inch flex duct connection. Requires a field supplied duct booster fan capable of 60 CFM at .2"W.C. or 90 CFM at .4"W.C. For fan static pressure requirements, see installation manual.

Fresh Air Intake Kit
KHRS940-25

Fresh air kit for RGLX/RULX/RSLX systems. Kit contains Current Sensor with Built-in Relay and Switching Power Supply. Requires field supplied ductwork and a fan capable of generating 15 CFM at a static pressure of approximately 0.26" WC.

Air Outlet Shutter Plate
UTR-YDZK

Installed at the air outlet when 3-directions mode is performed.

Air Outlet Shutter Plate
UTR-YDZB

In a 3-way air flow configuration an Air Outlet Shutter Plate kit is required to block air flow of 1 louver.

MISCELLANEOUS

3-Pole Single Throw Safety Switch
K3PST

For use where code requires a disconnect at the indoor unit.

R410A Swivel Adapter
K9R410A55

In order to minimize incorrect charging of systems with R410A Fujitsu uses a different access port. Contractors will need this 55-degree swivel access fitting.

Plug Model
UTY-WIFI

In order to connect certain models to Wired Wi-Fi Module, FJ-RC-WIFI-1NA, this plug must be used.

Condensate Pump
UTR-DPB24T

OEM design plugs into factory harness for ease of installation. Rated for 11.8" of vertical lift. Only used with System 36RSLX.

18+18 Combo Fittings Kit
K9FZ1818

Allows two 18,000 BTU indoor units to be used on an outdoor AOU36RLXFZ1. Requires special piping; limited to only 18,000 BTU models. Total BTU capacity is limited to 31,600 BTU in cooling. The kit upsizes linesets to 3/8" and 1/2".

Auto Louver Grille Kit

UTD-GXSA-W (for ARU7/9/12)
UTD-GXSB-W (for ARU18)
UTD-GXSC-W (for ARU24)

Auto Louver provides comfortable airflow and blends in with various interiors. Grille can be connected either directly to indoor unit or through the rectangular duct. Only compatible with ARU models with serial numbers greater than 2000.

Wide Panel
UTG-AKXA-W

Hides the gap between the ceiling hole and the cassette grille.

Panel Spacer
UTG-BKXA-W

If there is not enough height in the ceiling space, by inserting this spacer between the cassette grille and the ceiling surface, the height of the body goes into the ceiling space becomes 2 in. (50mm) lower.

High Humidity Insulation Kit
UTZ-KXRA

Install when the under-roof humidity is over 80% and the temperature is over 86 °F (30 °C)

Long-life Filter

UTD-LFNC
UTD-LFNB
UTD-LFNA

Long-life filter can be mounted to the indoor unit (medium static ducted models).

ARU Ducted			L = Inverter	S = Super Efficient	F = HFI (when followed by a "W" or "Z") or Floor Mount		
AUU Cassette Mount			U = Universal	F = HFI	H = High Heating		
AGU Floor Mount			G = Large Cassette / Medium Static	B = 230V	W = Wall Mount Only		
AOU Outdoor Unit					C = Compact Cassette or Slim Duct		
					B = 230V		
					E = Engineering Series		

NOTE: 1, 2 or 3 at the end of a model number denotes a model revision. Please note models may not be combined with each other.

THINGS TO KNOW BEFORE YOU BUY A FUJITSU SYSTEM

COMPLETE SYSTEM WARRANTY

Standard warranties vary depending on model:

6 Year Compressor / 2 Year Parts warranty OR

7 Year Compressor / 5 Year Parts warranty.

Extended warranties include:

10 Year Compressor/Parts warranty for Halcyon systems that have been installed by a licensed contractor and the online Product Registration* has been submitted.

12 Year Compressor/Parts warranty for Halcyon systems that have been installed by an Elite Contractor and the online Product Registration* has been submitted.

Systems must be registered within 60 days of installation for extended warranty.

10-Year and 12-Year warranties exclude: R22 models, IAQ models, ASU30RLX, ABU18RULX, ABU24RULX, ABU36RSLX, AUU18RLCX, AUU24RCLX, AUU36RCLX, AUU42RCLX, AOU18RLX, AOU24RLX, AOU30RLX, AOU36RLX, AOU42RLX

* Residents of California and Quebec are not required to register the System in order to obtain all of the rights and remedies applicable to this Warranty.

For full details, see Halcyon Warranty Statement.

TRADEMARKS

The Fujitsu logo is a registered trademark of Fujitsu Limited.

is a worldwide trademark of FUJITSU GENERAL LIMITED and is a registered trademark of Japan, the USA, and other countries or areas.

is a worldwide trademark of FUJITSU GENERAL LIMITED.

ENERGY STAR® is a registered trademark of the EPA and DOE.

Copyright © 2019 Fujitsu General America, Inc.

NON-INTERNET RETAIL POLICY

Internet sales are strictly prohibited and unauthorized. Any HVAC systems purchased on the Internet, from an online retailer or any similar e-tailing website, OR where the original factory serial numbers have been removed, defaced, or replaced in any way WILL NOT BE COVERED BY WARRANTY.

NOTE

- Condensing units come pre-charged from factory. Additional refrigerant may be required, be sure to check installation manual for more details.
- Cooling capacity is based on the following conditions:
Indoor temperature: 80°F DB/67°F WB (26.7°C DB/19.4°C WB)
Outdoor temperature: 95°F DB/75°F WB (35°C DB/23.9°C WB)
- Heating capacity is based on the following conditions:
Indoor temperature: 70°F DB (21.1°C DB)
Outdoor temperature: 47°F DB/43°F WB (8.3°C DB/6.1°C WB)

THINGS TO KNOW BEFORE YOU INSTALL A FUJITSU SYSTEM

WARNING

Always use a licensed installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion. Use only parts and accessories supplied or specified by Fujitsu. Ask a licensed contractor to install parts and accessories. Use of unauthorized or improper installation of parts and accessories can result in injury or property damage. Read the owner's operation manual carefully before using this product. The owners operation manual provides important safety instructions and warnings which should be followed closely. For any questions or concerns, please contact Fujitsu General America, Inc. Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.

HEAT PUMP DISCLAIMER

In most climates a heat pump will handle all of your heating needs. However, this system sometimes requires some other additional source of heat to satisfy heating requirements in the coldest environments. Almost all of Fujitsu's heat pumps use inverter technology and as such offer a wider operating range and more heat capacity than a standard heat pump but will not provide adequate heating if improperly sized or operated outside of its operating range. Specifications vary by model; please consult your contractor before choosing a heat pump as your only source of heat. Systems will maintain temperature up to +/-4 degrees relative to set temperature. To increase energy efficiency on multi-type systems, you should turn off the evaporators when heating or cooling is not needed.

DISCLAIMER

Fujitsu's products are subject to continuous improvements. Fujitsu reserves the right to modify product design, specifications and information in this brochure without notice and without incurring any obligations.

CERTIFICATIONS

ISO

ISO14001 is the standard defined by the International Organization for Standardization (ISO) related to environmental management systems. Fujitsu General America, Inc. has been acknowledged by an internationally accredited compliance organization as having an appropriate program of environmental protection procedures and activities to meet the requirements of ISO14001. The air conditioners manufactured by Fujitsu have received ISO9001 series certification for quality assurance.

Intertek

- ISO9001
- ISO14001

ASTM

Our outdoor units shall withstand 1,000 hours of salt spray tested per procedure ASTM B117.

ROHS COMPLIANT

Fujitsu participates in the RoHS Directive, which is the Restriction of Hazardous Substances in electrical and electronic equipment. It is an EU directive intended protect the environment by forcing manufacturers to eliminate or severely curtail the use of cadmium, hexavalent chromium, and lead in all products from automobiles to consumer electronics.

AHRI ENERGY GUIDE® PROGRAM (U.S.)
