INSTANT HVAC/R PATCH

Instant HVAC/R Patch is a combination of high strength bonding fluid and specialized bonding cells that form a durable bond similar to a 'weld.' This 'weld' permanently seals holes and cracks in all types of pipe and material used in the HVAC/R industry. Originally tested to hold up to 350 PSI, Instant HVAC/R Patch has now been tested to withstand pressures up to 1800 PSI, thanks to improvements to Highside's proprietary formula.

Features/Benefits

- Repairs are made in a minute!
- Safe to use with all refrigerants
- Rated at 1800 psi, 200°F
- Non-toxic
- Available 12/case

Use for copper tubing, **aluminum tubing**, micro coils, aluminum and copper coils, curved surfaces, steel & pvc condensate drains, condensate pans and lines.
