Washing Machine Leak
Detection & Shut-Off Valve

Application

LeakSmart® Washing Machine Leak Detection & Shut-Off Valve detects leaks and shuts off your washing machine line in less than 5 seconds, protecting you from devastating water damage. Plus, it alerts you when detecting water leaks with audible and visible alarms. The valve is installed on the washing machines incoming cold supply. Everything is pre-wired to simplify the installation.

Features

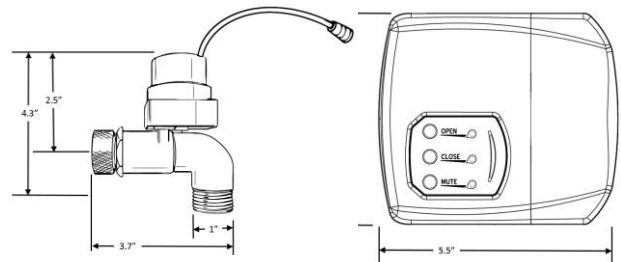

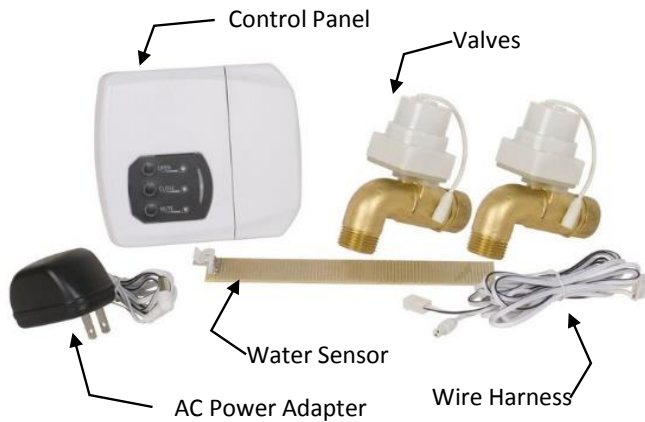

- Full port valves
- Quick connect wiring
- AC power with battery back-up
- Audible Alarm
- Alarm mute
- 3 LED status lights
- Self test feature

Product Specifications

- Max. operating pressure: 150 PSI
- Max. shut off pressure: 125 PSI
- Max. ambient temperature: 135° F
- Min. water temperature: 33° F
- Max. water temperature: 190° F
- Valve connection type: 3/4" MHT, 3/4" FHT

Materials

- Control panel: High performance engineered polymer
- Actuator: High performance engineered polymer
- Valve: Lead free brass

* Dimensions for reference purposes only

Control panel operates with AC power and has battery back-up (batteries not included)
