

Detect and Stop Water Leaks in 5 Seconds or Less

Leaks are inevitable. LeakSmart is essential.

Sources of potential leaks.

All throughout your home, there are sources of potential water leaks. LeakSmart senses a leak in 5 seconds or less, protecting you from devastating water damage.

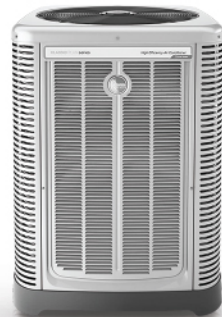

Toilets

Washing Machine

Air Conditioner
HVAC Systems

Refrigerator

Hot Water Heater

Sinks and Tubs

Dishwasher

Add protection to as many locations as you want.

Bad leaks happen to good people.

“I was away for the weekend and came home to water overflowing from the condensation pan of our HVAC unit. It ruined our ceiling and floors and cost me \$10,000 to replace.”

– J.P., Sacramento

“We disconnected the washing machine to do some work in the laundry room. It wasn't hooked back up properly and leaked all over our storage boxes in the basement. Nightmare!”

– P.D., White Plains

“My wedding album, all my shoes, and the antique sofa that was in my family for 60 years. All gone when my water heater failed.”

– A.S., Austin

“The day before our Christmas Party, our pipes burst – soaking our entire living room. We had to cancel the party. Worst Christmas ever.”

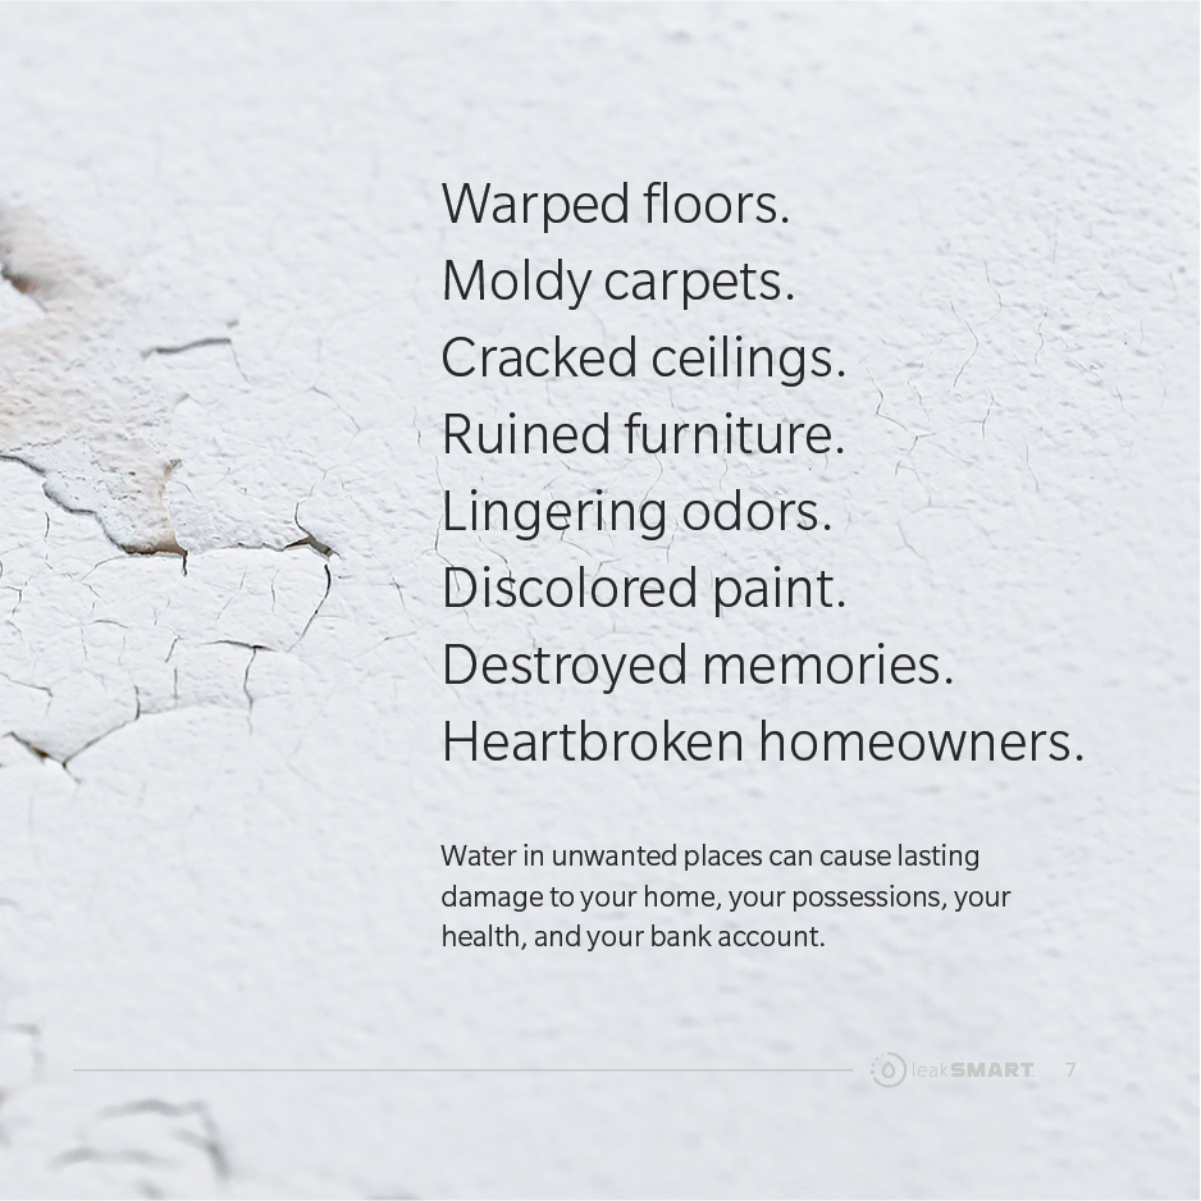

– S.H., Andover

Water can cause lasting damage.

You protect your home from fire. You protect your home from theft. Water damage is actually more likely to happen to you than either fire or theft.

Insurance companies report that water damage from sources inside a home is the #2 reason for a homeowners insurance claim.

Warped floors.
Moldy carpets.
Cracked ceilings.
Ruined furniture.
Lingering odors.
Discolored paint.
Destroyed memories.
Heartbroken homeowners.

Water in unwanted places can cause lasting damage to your home, your possessions, your health, and your bank account.

Introducing LeakSmart

LeakSmart detects leaks and shuts off your water main in less than **5 seconds**, protecting you from devastating water damage.

That's all you really need to know! But read on to learn more about how LeakSmart can protect against water damage from troublesome leaks.

LeakSmart is leak and flood protection solved.

Senses leaks.

Place wireless, waterproof LeakSmart Sensors around appliances, water heaters, bathrooms, and HVAC units for nonstop protection.

Responds instantly.

At the first sign of unwanted water, the LeakSmart Sensor springs into action, sounding an alarm, sending a text alert, and prompting the LeakSmart Valve to shut off your water main supply.

Prevents damage.

The LeakSmart Valve shuts off your water in 5 seconds or less and thus prevents any further damage in the event of a leak.

LeakSmart Valve

An electronic motorized brass ball valve that connects to your main water line.

Receives signal and automatically shuts off your house's entire water supply to prevent any further damage.

LeakSmart Sensor

Place behind appliances, under pipes, and in other places where leaks may occur.

Detects leaks and monitors temperature.

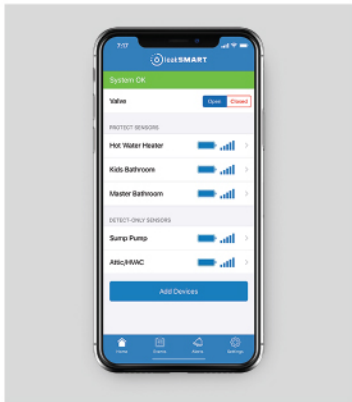

Signals your LeakSmart Valve to automatically shut off water the moment a leak is detected.

LeakSmart Hub

Communicates between the sensors, the valve, and you.

The LeakSmart System can also be used with other compatible Smart Home platforms.

LeakSmart App

Instantly notifies you when a leak is detected, and monitors temperature, battery life, and connectivity.

The app also enables you to turn your main water on or off remotely.

Sensible Smart Home integration.

LeakSmart works on its own or with other Smart Home platforms.

Works with Nest.

LeakSmart leverages your Nest thermostat in several ways:

- ◆ Alerts you to turn off your HVAC unit if a leak is detected nearby.
- ◆ Reminds you to turn off your main water if you are away for more than 48 hours.
- ◆ Notifies you and your Nest emergency contacts if there is a leak.

Plays well with others.

LeakSmart integrates perfectly with other home automation systems such as Nest, SmartThings, Wink, or Iris.

Works on its own.

Don't have a Smart Home system yet? Simply pair with the LeakSmart Hub and turn your home into a Smart Home with 24/7 protection from unwanted leaks.

Even your backup plan has a backup plan.

LeakSmart has built-in fail-safe measures to make sure you're always protected.

No Wi-Fi, no problem.

LeakSmart continues to work even if the Internet goes down, thanks to Zigbee, a reliable and secure radio frequency for Smart Home devices. It ensures that your house is protected 24/7 – even if Wi-Fi is down.

Emergency contacts.

Add your plumber, a relative, or your neighbor as an emergency contact, to be notified to come to the rescue if you are out of town.

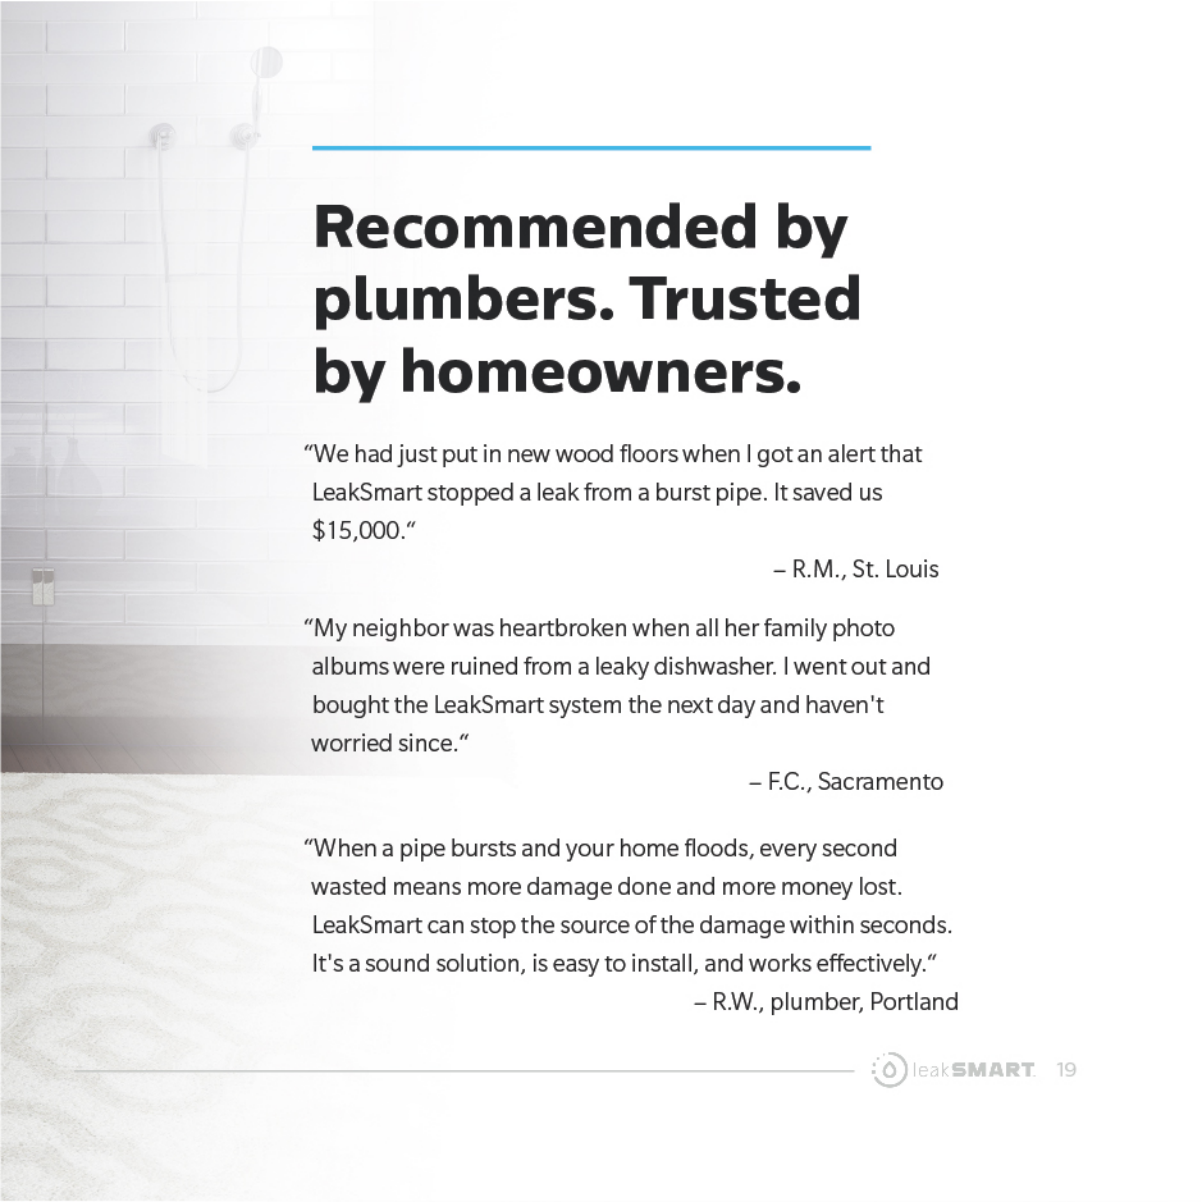

Supported by many insurance companies.

Insurance companies often reward consumers who take steps to protect their homes. Many now offer annual rebates for the installation of a LeakSmart system to prevent catastrophic damage.

Please check with your insurance provider.

Recommended by plumbers. Trusted by homeowners.

“We had just put in new wood floors when I got an alert that LeakSmart stopped a leak from a burst pipe. It saved us \$15,000.”

– R.M., St. Louis

“My neighbor was heartbroken when all her family photo albums were ruined from a leaky dishwasher. I went out and bought the LeakSmart system the next day and haven't worried since.”

– F.C., Sacramento

“When a pipe bursts and your home floods, every second wasted means more damage done and more money lost. LeakSmart can stop the source of the damage within seconds. It's a sound solution, is easy to install, and works effectively.”

– R.W., plumber, Portland
