

## The new Nest Protect

Smoke and carbon monoxide alarm.  
It thinks, speaks, and alerts your phone.

### Meet Nest Protect.

There's never been a smoke and CO alarm quite like this. Nest Protect looks for fast-burning fires, smoldering fires, and carbon monoxide. It also speaks up when there's a problem, can be hushed from your phone, and it will even message your phone in case you're not home.

### How does it work?

#### Get alerts on your phone.

Nest Protect can send you a message when there's a problem or the batteries run low.

#### Tells you what and where.

Nest Protect speaks up if there's smoke or CO and tells you where it is, so you know what to do.

#### Sees the CO you can't.

Carbon monoxide is an invisible, poisonous gas. Nest Protect tells you where it's hiding.

#### A light in the dark.

Usually Nest Protect has its light turned off, but when you walk underneath it, Pathlight can light your way.

#### Every second counts.

The Split-Spectrum Sensor looks for both fast and slow burning fires.

#### Hush from the Nest app.

Just burned the popcorn? Quiet the false alarm with your phone, not your dish towel.

#### 10-year life span.

Nest Protect's long-lasting sensors keep you safe and sound for up to a decade.

#### Sleep safe and sound.

Nightly Promise is a quick green glow when you turn out the lights that says everything's working well.
