

DuraCoil

NEW

COIL & SURFACE PROTECTANT

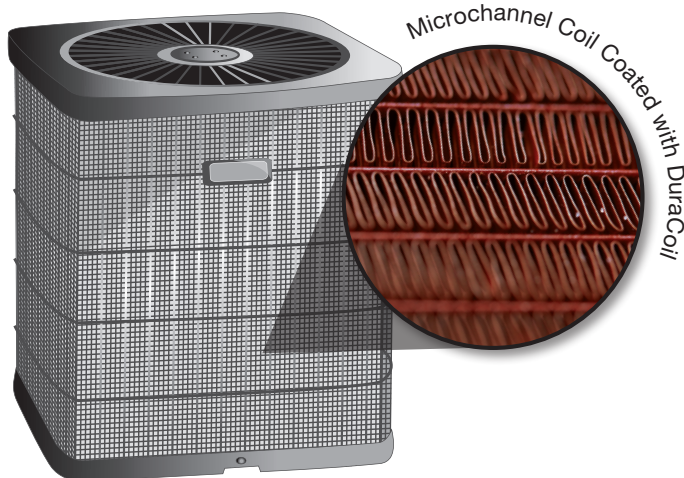

A LONG-LASTING COATING FOR COILS IN CORROSIVE ENVIRONMENTS

- ▶ Durable, OEM-approved Heresite® coating
- ▶ Protects from corrosion
- ▶ For coastal, industrial, or agricultural settings; plus protects refrigeration coils against food acids
- ▶ Causes negligible heat transfer loss
- ▶ Great to repair an OEM coating already in service
- ▶ Fast, air-dry formula bonds to all metals

PART #: 4083-90

By simply spraying on DuraCoil surface coating, you can extend the service life of coils or other system components and protect them from corrosion. DuraCoil is an aerosol-based, brown-colored coating that has been used by OEMs for many years – now available for contractors from Nu-Calgon. Spray a protective coating on new installations, or use to repair scratched or worn coatings on existing equipment. With DuraCoil, you're protected from even the most corrosive environments.

Heresite is a registered trademark of Heresite Protective Coatings
