Nu-Calgon's Talon tool flexes into spaces where a bulky aerosol can can't reach, and it sprays with greater precision and less waste. It can easily reach inside a coil to spray from the inside out; or it can flex around obstructions to treat tough-to-reach locations. To install, simply remove the existing spray nozzle from the aerosol can and attach the Talon on top (make sure you wear protective eyewear and gloves and follow the instructions on the Talon package). Once armed with Talon, precise control is within your grasp!
