BROAN

BROAN VENTILATION SOLUTIONS.

BETTER AIR. BETTER LIFE.

WHEN YOUR HOME BREATHES,

WHY INDOOR AIR QUALITY IS IMPORTANT TO YOU.

Consider this, according to the EPA (epa.gov), indoor air quality is five times worse than outdoor air quality. Most homeowners know that indoor air quality is important, but not all recognize what contributes to poor indoor air quality, the potential effects and harm, and how to address these problems. Broan is here to help. For more than 85 years, Broan has led the industry with residential ventilation solutions that improve indoor air quality and provide healthier home environments.

Moisture that is not properly ventilated can cause mildew and mold formation, which can potentially lead to structural problems and health problems. Exhaust ventilation solutions from Broan remove humidity at the source to help maintain the optimal humidity balance of 40 to 60 percent.

Off-gassing from construction materials, carpeting, adhesives and synthetic materials—as well as solvents from common household cleaners—can accumulate in tightly built homes. Look to Broan for continuous ventilation solutions that meet ASHRAE 62.2.

Particulates from dust, allergens, pet dander, and more can contribute to poor indoor air quality up to 100 times dirtier than outside air. With a properly ventilated home, you create a more enjoyable, comfortable and healthier environment.
Cooking effluents from food preparation can infiltrate the whole house in minutes. Grease, oils and aromas settle permanently into carpets, furniture, clothing and other surfaces. Kitchen ventilation solutions help eliminate cooking effluents for a cleaner, more comfortable and healthier environment.
YOU BREATHE EASIER TOO.

BROAN CAN IMPROVE INDOOR AIR QUALITY
IN EVERY ROOM OF THE HOME.

From clearing humidity in the bathroom to removing heat, steam and airborne effluents in the kitchen. From whole-house HEPA air filtration and balanced fresh air exchange solutions to attic ventilation. From the family room to the master bedroom and in every room in between, no company knows residential and light commercial ventilation like Broan. After countless innovations and a commitment to indoor air quality, trust Broan to clear up every concern.

EXHAUST VENTILATION
removes excess moisture and odor from any room in the home, and can also provide continuous, whole-house ventilation.
KITCHEN VENTILATION
expels cooking effluents from food preparation to eliminate airborne pollutants from spreading through the entire house.

FRESH AIR SYSTEMS
efficiently exchange inside air with fresh outside air, and remove airborne particulate with HEPA filtration.

DID YOU KNOW?*

Knowing the facts goes a long way toward a healthier indoor environment:

Just **46%** recognize not having a bathroom fan has a negative impact on indoor air quality—only 42% recognize that a lack of a range hood also has a negative impact.

60% have a fan in each bathroom but only one in five let it run for 10 minutes after showering.

Some homeowners don't recognize the causes of poor indoor air quality:

Only **42%** are concerned about moisture that causes mold or mildew.

Only **33%** know food aromas after preparation is an indicator of poor IAQ.

81% don't know that a foggy mirror means poor IAQ.

Most homeowners are tuned in to residential Indoor Air Quality concerns:

60% know that indoor air quality has a greater impact on their health than outdoor air quality.

90% realize poor indoor air quality contributes to certain health issues and that healthy air helps prevent illness.

* 2014 Kelton Broan Air Quality Survey

INDOOR AIR QUALITY IS IMPORTANT IN EVERY ROOM OF THE HOME, NOT JUST THE BATHROOM.
The original
1932 Motordor

THE UNDISPUTED LEADER IN INDOOR AIR QUALITY SINCE 1932.

INDUSTRY LEADERSHIP ISN'T A CLAIM. IT'S EARNED THROUGH INNOVATION.

In southeastern Wisconsin some eight decades ago, an engineer named Henry Broan had a revelation: Wouldn't a built-in mechanical ventilation solution help to provide better indoor air quality in the kitchen? And so, Motordor was conceived—the first kitchen ventilator— and a company was born. Once Mr. Broan had invented a new category, other applications were the natural next step. The bath ventilation fan soon followed, as the passion for improving indoor air quality continued.

Leadership is built on standards, all to help ensure the professionalism of an industry. So in 1957, Broan was among five companies that founded the Home Ventilating Institute (HVI). To this day the HVI mark ensures what's stated on the package is tested and certified for your confidence. Because Mr. Broan believed that if you paid good money for something, you deserved to get what was promised.

Throughout the years, countless innovations followed, including some of the first certified ventilation fans and range hoods with efficient motors and lighting that reduced energy consumption by as much as 70%. And as homes were built tighter, Broan was on the leading edge of whole-house ventilation solutions with HEPA filtration and energy recovery capabilities. Today, Broan continues to lead the industry with efficient and quiet ventilation solutions that are easier than ever to install.

You see, leadership isn't about entering a market, offering a handful of products, and staking a claim. Leadership is earned and proven through a passion and commitment to finding novel solutions to real problems time and time again. This is exactly why Broan has taken the job of improving air quality in our homes very seriously for more than 80 years.

WE INVENTED THE CATEGORY IN 1932. WE HAVE NO INTENTION OF STOPPING.

1933: Kitchen ventilator: Motordor is sold

1957: Founder of the Home Ventilating Institute

1956: The bath fan

1959: The fan/light

1965: Introduced the first heater fan light

1993: The first humidity sensing fan hits the shelves

DID YOU KNOW?

Professional **contractors** recognize the Broan ventilation brand above all others.

Broan is the **only** company in North America with an HVI Certified on-site sound testing facility.

Twenty-four*of the top 25 builders specify the Broan brand. More builders use Broan ventilation products than any other brand.

*2015 Hanley Wood Builder Brand Use Study

Broan is a **three-time** winner of the International Service Excellence award. The Customer Service Institute of America recognizes organizations for customer service professionalism.

ENERGY STAR A partner since 2005, Broan has one of the largest ENERGY STAR offerings in the industry, including many ENERGY STAR Most Efficient products. **energystar.gov**

Broan was a **founding member** of the Home Ventilating Institute,® an independent organization that certifies airflow and sound performance of ventilation products. **hvi.org**

About 80% of Broan products are manufactured in our state-of-the-art manufacturing facilities in Hartford, Wisconsin.

2004: The quiet fan <0.3 sones

2004: The first recessed fan light

2005: The ENERGY STAR® certified fan

2012: The first fan enabling easy room-side installation

2014: The first fan with Soft Surround™ LED lighting technology

2015: The wireless speaker fan

SENSONIC™

BROAN KNOWS TODAY'S STRINGENT VENTILATION CODES AND STANDARDS.

Because today's homes are built tighter than ever before, what gets in stays in, unless mechanically ventilated out. Premium ventilation solutions from Broan dramatically reduce moisture as well as airborne pollutants from off-gassing building materials, adhesives and household cleaners. They also help eliminate allergens, dust, pet dander and cooking effluents—everything that contributes to poor indoor air quality.

Both spot and whole-house ventilation are important.
Spot ventilation products remove pollutants at the source when they occur—think bathroom fans and kitchen range hoods—quickly eliminating humidity, odor and cooking effluents.

Whole-house ventilation, also known as continuous or dwelling unit ventilation (DUV), continually removes what's not captured by spot ventilation for a more healthy and comfortable home.

Understanding today's ventilation requirements.
The American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) set the industry standard for ventilation and acceptable indoor air quality for low-rise residential buildings with ASHRAE 62.2. It sets the minimum standard for spot or local ventilation of individual bathrooms of 50 Cubic Feet per Minute (CFM) delivered airflow at 3.0 sones or less. It also specifies the requirements for whole-house ventilation of an entire dwelling at the maximum sound rating of 1.0 sone for ventilation fans.

Code adoption growing rapidly.
California was a leader in this area with their Title 24 Code. Other state and city governments are quickly adopting similar codes such as the International Energy Conservation Code (IECC) to improve energy efficiency as well as indoor air quality.

Above-code green building programs such as ENERGY STAR® for Homes, ENERGY STAR® Indoor Air Plus, the Leadership in Energy and Environment Design (LEED) Certification Building Program and the National Association of Home Builders (NAHB) Green Building Standard are certified green building programs that promote human health and conserve natural resources. Let Broan help you meet the goals of these programs.

You've come to the right place for product solutions.
With Broan's extensive product line-up, including exhaust and balanced ventilation options such as Heat Recovery Ventilators (HRVs) and Energy Recovery Ventilators (ERVs), you're sure to find the ideal solution to meet your needs.

SELECTING THE PROPER WHOLE HOUSE RESIDENTIAL VENTILATION SOLUTION.

Sizing your solution is a factor of square footage and the number of bedrooms in the dwelling to meet requirements. These charts are based on ASHRAE 62.2. Note that the 2010 and 2013 versions are different. Most states still operate under 62.2–2010 rates. Before specifying, check local building codes to ensure it meets requirements.

ASHRAE 62.2—2010 Required Continuous Ventilation Rate (CFM)

Floor Area Sq. Ft.	0–1 BR	2–3 BR	4–5 BR	6–7 BR	>7 BR
<1500	30	45	60	75	90
1501–3000	45	60	75	90	105
3001–4500	60	75	90	105	120
4501–6000	75	90	105	120	135
6001–7500	90	105	120	135	150
>7500	105	120	135	150	165

ASHRAE 62.2—2013 Required Continuous Ventilation Rate (CFM)

Floor Area Sq. Ft.	0–1 BR	2–3 BR	4–5 BR	6–7 BR	>7 BR
<500	30	40	45	55	60
500–1000	45	55	60	70	75
1001–1500	60	70	70	85	90
1501–2000	75	85	90	100	105
2001–2500	90	100	105	115	120
2501–3000	105	115	120	130	135
3001–3500	120	130	135	145	150
>3501	135	145	150	160	165

AN ALTERNATIVE FORMULA APPROACH TO THE TABLES GIVEN ABOVE.

An alternative formula approach to the tables given above also exists and typically results in a lower, more precise CFM requirement. Under the more common 62.2-2010 version, continuous CFM requirements can be calculated using a formula as follows.
CFM = .01 x floor area (in square feet) plus 7.5 x (number of bedrooms + 1).

Example: A 3,500 square foot home with 4 bedrooms would require 73 CFM
.01 x 3,500 = 35
7.5 x (4+1) = 38
Add together for a total of 73 CFM (as compared to the 90 from the above table).

The 62.2-2013 version increases the multiplier for floor area from .01 to .03. Note however that infiltration credits can be taken if blower door testing is conducted.

Note that in addition to exhaust solutions to meet DUV requirements, we also offer a full line of balanced ventilation models (HRVs and ERVs).

BROAN CODE KEY
The exclusive online tool that ensures compliant ventilation selection.

Specifying a dwelling unit ventilation (DUV) system for residences can be complicated. Code Key from Broan is the only online resource that helps you select the right product in minutes. Choose the dwelling's state, home size facts and user preferences to receive a list of recommended ventilation products. Change parameters to instantly see a range of options. Code Key requires no software and works on mobile devices. It's another way Broan— the pioneer in ventilation for more than 80 years—leads the ventilation industry with forward-thinking products and customer service.

Broan.com/tools-landing-page/codekey
A REVOLUTION IN
VENTILATION FAN TECHNOLOGY
ENGINEERED TO SIMPLIFY INSTALLATION.

WE DIDN'T JUST CHANGE ONE THING TO MAKE INSTALLATIONS FASTER, WE CHANGED EVERYTHING. From a unique telescoping mounting frame that installs room-side on retro-fits to an easy-to-insert housing and blower that snap into place, we designed the ULTRA™ Series to be the fastest, easiest, most universal installation in new construction or retro-fit. No matter what's behind the drywall on your next retro-fit job, you'll never have another difficult installation. And just as important, the ULTRA™ Series meets whole-house mechanical ventilation codes and green building program requirements. It's a revolutionary way to install and a revolutionary way to ventilate.

QStream™

SOUND TECHNOLOGY

Reduce sound levels and improve sound quality in real-world installations. The innovative, patent-pending QStream™ technology utilizes airflow-smoothing baffles that reduce turbulence which means the blower can turn more slowly and quietly—without airflow loss.*

*Not available on 110 CFM ULTRA Green™ Models
Inside/outside wiring capability provides flexible new or retrofit installation

Pre-installed screws in the mounting frame enable quick installation

Vertical positioning tabs ensure the housing is in the right place

The expandable mounting frame adjusts from 14"–24" and fits any type of joist, I-Joist or truss construction
ULTRAQUICK™

INSTALLATION TECHNOLOGY

ULTRA™ Series Ventilation Fans are engineered to be the fastest, easiest, most universal installation in remodel, retrofit and new construction—in any type of joist or truss system. Exclusive features simplify room-side installation to save valuable time and money.

RDFU PREMIUM RADIATION DAMPER FOR ULTRA GREEN™ AND ULTRA PRO™ FANS.

When the air temperature passing through the damper exceeds 165ºF the fusible link melts, triggering the thermal fabric to automatically close across the damper. Airflow is interrupted by a flame and heat barrier, preventing the rapid spread of fire to other areas.

- Motor serviceable without disturbing drywall
- Galvanized steel frame
- High temperature, non-asbestos, reinforced fiber thermal fabric
- Stainless steel closure springs
- 165ºF fusible link

- Use the same grille provided with the ULTRA™ Series fan
- Use Model RDFU with RDJUMPU for ULTRA Green™ and ULTRA Pro™ models with lighting and/or sensing
- UL Standard 555C Classified

THE PERFECT SOLUTION TO MEET TODAY'S CONTINUOUS VENTILATION REQUIREMENTS.

Built for easy installation in either new construction or retrofit applications, the ULTRA Green™ Series makes it simple to ventilate any room in the house. In today's tightly built homes, unhealthy pollutants and excess humidity stay trapped inside unless they are mechanically vented away. Exclusive ULTRA Smart™ DC Motor and Control Technology enables fans to maintain their powerful operation—even at high static pressures—and provide required air movement levels for whole-house ventilation, all while meeting spot ventilation needs on demand. Continuous CFM levels can be precisely adjusted to meet the specific needs of each home.

- HVI certified at <0.3 Sones, ULTRA Silent™ Sound Technology provides the quietest sound rating obtainable
- 50, 80 or 110 CFM
- Intermittent and continuous ventilation
- ULTRA Smart™ DC Motor and Control Technology monitors performance and adjusts motor speed to ensure rated air movement
- ENERGY STAR® certified
- ULTRA Quick™ Installation Technology saves time with the fastest, easiest, most universal installation
- XB and ZB models feature 6" ducting—50 and 80 CFM models include an optional 6" to 4" duct reducer
- Bright, energy efficient LED lighting
- UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit
- Type IC
- Fits 2" x 8" ceiling construction
- Optional RDFU Premium Radiation Damper Kit available for all XB and ZB models.
- Models XB50, XB80, ZB50 and ZB80 feature QStream Technology

SPANS 14" TO 24"-ON-CENTER FRAMING

ULTRASMART™
DC MOTOR AND CONTROL TECHNOLOGY

To virtually ensure full-rated performance—regardless of the ducting situation—ULTRA Green™ Series fans automatically monitor and adjust CFM output. For continuous ventilation needs, multi-speed models may be precisely set as low as 30 CFM to avoid costly over-ventilating. A second dial controls runtime at maximum CFM. Our DC motor is the most efficient in our line—80 CFM models use only 5.8 watts.

ULTRASILENT™
SOUND TECHNOLOGY

ULTRA Green™ Series Ventilation Fans are HVI certified at a remarkable <0.3 Sones; the quietest sound rating obtainable. A dynamically balanced DC motor mounted behind the wheel, a state-of-the-art blower that reduces turbulence, and a free-flowing 6" duct outlet opening that won't inhibit airflow make it possible. There's no quieter fan available.

POWERFUL
HUMIDITY & MOTION SENSING TECHNOLOGIES

ULTRA Fans with Sensaire humidity sensing technology detect the rapid rise in humidity at the ceiling level. This means that they will react to shower humidity much faster than competitive fans or wall controls. Multi-speed models turn the fan speed up from the lower continuous CFM level. Single-speed models turn the fan on automatically.

ULTRA Fans with motion sensing and multi-speed capability automatically turn the fan up to maximum speed from the lower continuous setting when motion is detected which is ideal for family members who forget to turn the fan on.

ULTRA GREEN™ SERIES FANS SAVE UP TO 10 HERS POINTS AND UP TO $200 PER YEAR IN OPERATING COST.*

BROAN QT SERIES

SO QUIET, YOU MIGHT EASILY FORGET
IT'S ON.

PEACEFUL MOMENTS CAN BE ENJOYED EVEN MORE WITH VENTILATION FROM A QUIET, QT SERIES FAN. The very quiet Broan QT Series is the ideal solution for any room that benefits from ventilation. Most QT models operate at less than one sone—the sound of a quiet running refrigerator. But quiet operation doesn't mean less power. Installed properly, the QT Series maintains full-rated airflow in real-world installations. So choose a QT Series bath fan, fan/light or heater/fan/light for your application. Broan has the perfect solution for every room.

QTXE FAN FEATURES

- Very quiet operation 0.3 to 1.4 sones
- 80 CFM to 150 CFM
- QTXE features 6" ducting for superior performance

- QTXE models are ENERGY STAR® certified
- HVI Certified
- QTXE includes hanger bar system for fast, flexible installation for all types of construction

- Motor engineered for continuous operation
- UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit

- Fits 2" x 8" ceiling construction
- Radiation damper available separately, see page 19

QTXE

QTXE150
QTXE080, QTXE110

Broan QT Series™ Bath Fans. A bath fan needn't call attention to itself, especially when you don't want it to overpower the design of your bath or powder room. More important, it shouldn't call attention to itself when it's working. So we developed the QT Series™ to provide very relaxing ventilation. With an energy efficient option, it simply does its job quietly, in every sense of the word.

QTXE FAN/LIGHT FEATURES

- Very quiet operation 0.3 to 1.4 sones
- 80 CFM to 150 CFM
- QTXE models feature 6" ducting for superior performance
- QTXE models are ENERGY STAR® certified

- Bright, energy efficient 36 watt fluorescent lighting (2, 18 watt GU24 based bulbs) included with non-sensing QTXE and QTRE models
- QTXE includes hanger bar system for fast and flexible installation for all types of construction

- 4 watt night light on all models (bulb not included)
- Motor engineered for continuous operation
- UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit
- HVI Certified

- Type IC
- Fits 2" x 8" ceiling construction
- Radiation damper available separately, see below

QTXE
QTXE150FLT
QTXE080FLT, QTXE110FLT

Broan QT Series™ Fan/Lights. The QT Series™ is the ultimate bath fan solution for today's homes. Select a QT Series™ fan/light to bring simple elegance to any bath or powder room. By sight or by sound, you'll barely notice a QT Series™ fan. Except, of course, when you need just the right amount of ventilation and light at the touch of a switch.

PREMIUM RADIATION DAMPERS FEATURES

- Motor serviceable without disturbing drywall
- Galvanized steel frame
- High temperature, non-asbestos, reinforced fiber thermal fabric
- UL Standard 555C Classified

- Stainless steel closure springs
- 165°F fusible link
- Use the same grille provided with the QT Series™ fan

Premium Radiation Dampers. When the air temperature passing through the damper exceeds 165°F the fusible link melts, triggering the thermal fabric to automatically close across the damper. Airflow is interrupted by a flame and heat barrier, preventing the rapid spread of fire to other areas.

Radiation Dampers	Description
RDFQF	For QTXE080 & QTXE110
RDFQL	For QTXE080FLT & QTXE110FLT
RDFQL plus RDJUMPQ	For QTXE110S

**Humidity Sensing Fans with Sensaire® Technology.**
Broan Sensaire® technology is a hands-free solution to fighting excess humidity and possible mold problems. It detects rapid increases in moisture levels at the ceiling, where steam and humidity naturally rise, and automatically turns the fan on.

With fans this quiet, we included automatic shutoff to save worry, and money. Broan Sensaire® technology is a perfect solution for high traffic bathrooms, the kids' bathroom, or for anyone who leaves the house before humidity is properly vented.

BROAN SMARTSENSE®
## AUTOMATICALLY COORDINATE YOUR BATH FANS

RDFQF

RDFQF PREMIUM RADIATION DAMPER FEATURES.

When the air temperature passing through the damper exceeds 165°F the fusible link melts, triggering the thermal fabric to automatically close across the damper. Airflow is interrupted by a flame and heat barrier, preventing the rapid spread of fire to other areas.

A SMART, ECONOMICAL OPTION TO MEET ASHRAE STANDARD 62.2.

Since most homes have several ventilation fans, Broan SmartSense® automatically operates your fans to ventilate your home around the clock. It's one solution for continuous and spot ventilation requirements.

A SmartSense® system coordinates ventilation fans in various locations to introduce fresher, healthier air. It may be programmed to ventilate based on the home's size, automatically cycling different fans based in the dwelling based on square footage and the number of bedrooms. SmartSense® is cost effective as it does not require integration with the home's air handler, and with only one fan running at a time, it uses less than 40 watts during ventilation cycles.

Broan QT Series™ Fan

Exhaust Vent

Broan SmartSense® Control
Model	CFM	Dimension
SSQTXE080	80	$11^{3}/_{8}$ x $10^{1}/_{2}$ x $7^{5}/_{8}$
SSQTXE110	110	$11^{3}/_{8}$ x $10^{1}/_{2}$ x $7^{5}/_{8}$

Wireless home control technology powered by INSTEON™.
- New timed-off and delayed-off features with new firmware
- Automatically operates the SMD series Make-Up Air Damper for installations requiring make-up air

AND RANGE HOOD TO VENTILATE YOUR HOME.

SMD6 | SMD8

A BROAN AUTOMATIC MAKE-UP AIR DAMPER INTELLIGENTLY BRINGS FRESH AIR INSIDE.

The damper communicates with SSQTXE080 and SSQTXE110 fans as well as select BEST® and Broan range hoods to form a complete balanced ventilation system that ensures fresh air is available while ventilation is in process. This ensures balanced indoor air pressure while preventing unwanted air infiltration and wasted energy. SmartSense™ automatically operates the Make-Up Air Damper for installations requiring make-up air.

Easy Installation
- Located in a 6-inch or 8-inch duct running between an exterior wall fresh air inlet (641FA or 643FA) to an interior location such as a cold-air return or supply duct
- Locally powered by a 24 VAC transformer
- Communicates over existing home electrical wiring

Broan Make-Up Air Damper features:
- Heavy-duty galvanized steel construction
- 24 VAC transformer
- 6-inch round (SMD6), 8-inch round (SMD8)
- Use with any single fan or combination of SSQTXE080 or SSQTXE110 fans

HVI 2100 CERTIFIED
FLEXIBILITY FOR
NEW CONSTRUCTION AND

FLEX SERIES FANS WITH TRUESEAL™ DAMPER TECHNOLOGY CAN
SAVE UP TO 1 HERS POINT AND UP TO $9 PER YEAR IN OPERATING COSTS.*

FoldAway™ Mounting Ears are precisely positioned for new construction and fold flat for room-side retrofits. Every installation can be handled more efficiently.

With our TrueSeal™ Damper Technology, FLEX fans reduce air leakage by up to 50% compared to competitive models,[1] resulting in better home performance via blower door tests.

EzDuct™ Connector enables room-side installation without attic access. Attach the housing, pull the duct through, attach the EzDuct™ Connector and reset it with one screw.

*Compared to competitive fans; based on software calculations and analysis conducted by Broan. Testing reflects total fan housing air tightness.

[1]See Broan.com/flex for details.

ROOM-SIDE RETROFIT FROM
ONE FAN.

VERSATILE INSTALLATION. AIRTIGHT PERFORMANCE. LED LIGHTING.

FLEX Series gives professionals smart options for new construction or room-side retrofits in one, hard-working product line. FLEX is about innovations such as FoldAway™ mounting ears and TrueSeal™ Damper Technology that improves building airtightness like never before. With fresh grille designs and a full range of operating points, there's an FLEX Series solution for every installation.

Flex™ SERIES

Dimmable LED Lighting offers greater energy efficiency and longevity, and adds a unique design detail to this hard-working fan. 11 watt, 800 Lumens integrated LED module lasts up to 25,000 hours.

Flex™ SERIES

FLEX FAN & FAN/LIGHT FEATURES

AE50, AE80, AE110, AE80B, A80, A80HD, A110

- FoldAway™ mounting ears allow for easy installation in both new construction and room-side replacement

- New TrueSeal™ damper technology forms a tighter seal to reduce backdrafts

- EzDuct™ Connector creates an air-tight seal from inside the housing allows room-side installation with no attic access required

- Effective ventilation clears humidity and odors

- Attractive grille styling

- UL Listed for use over tub and shower when connected to a GFCI protected branch circuit.

AE80L, AE80BL, AE110L

- LED Fan/Light with 11 watt, 800 Lumens, 3000K, 80 CRI integrated module

A WELL VENTILATED ROOM IS A

HEALTHIER

LOOK TO BROAN, THE VENTILATION EXPERTS, TO KEEP EVERY ROOM OF YOUR HOUSE FRESH. Broan engineers the right product to fit every application, room size and need. Select from a variety of features that best meet your spot ventilation needs. Begin by assessing how powerful the fan should be or whether you could use additional lighting in your space. Think about what product style, finish or shape would look best. Rest assured, if you're concerned about saving money and energy, Broan bath fans that feature ENERGY STAR® can reduce energy consumption by as much as 70%. Broan has the perfect product designed around your needs.

Wall or ceiling mount, LoProfile is the right fan for a tight fit. The new Broan LoProfile™ Fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2x4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet, efficient ventilation.
LP80, LP110

ROOM.

The LP80 oval connector accepts standard 4" duct, or 3" duct with the supplied adapter

Duct-free. This easy-to-install solution is ideal where air circulation is needed but ducting is impossible or impractical. Use it as a solution for half baths or rooms where humidity isn't a concern.

QUALITY VENTILATION THAT COMPLEMENTS YOUR DÉCOR.

Every room needs ventilation, from closets to bedrooms to baths. But adding a fan/light combination that complements or enhances the room décor has been challenging. That's why the Broan Architectural products are perfect. Imagine a fan/light combination fixture that unobtrusively blends into the ceiling. Or a statement fan/light with a stunning LED perimeter glow that showcases your unique décor. The Architectural series helps you meet your decorating challenges without compromising your style.

VENTILATION THAT MOVES
IN RATHER
THE AIR,
MOVING WAYS.
744 SERIES RECESSED FAN/LIGHT FEATURES

- High efficiency centrifugal fan
- 70 CFM at 1.5 sones
- Trim matched to designs of major recessed light manufacturers
- Put multiple units in larger rooms
- Model 744 uses a standard E26 base, 75 watt maximum (R30 or BR30 for standard applications)

- Model 744LED includes a 10 watt, GU24 based LED bulb (included)
- All models UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit. Model 744 requires a PAR30L or PAR30LN type bulb (not included)

- 6⁷/₈" high housing appropriate for new construction and 2" x 8" ceiling joists
- 4" round duct connector
- Optional wall control switches available
- Type IC, sealed housing
- Not for use over cooking surfaces

EVERY ROOM CAN BE MORE

COMFORTABLE WITH A LITTLE VEN

THERE'S A BROAN VENTILATION SOLUTION FOR EVERY ROOM IN YOUR HOME. Without doubt, every room needs ventilation. That's why our specialty lines deliver clean, fresh air where you need it most–including your bathrooms, laundry room, recreation room, workshop or nursery. Look to our room-to-room, wall/ceiling mount, through-wall or vertical discharge utility fans for powerful spot ventilation. Or, install our remote mounted in-line ventilation system for a quiet whole-house solution. Our recessed fan/lights perfectly match other recessed fixtures, including humidity sensing options that start automatically when a rapid rise in humidity is detected. Elegant, simple, practical and powerful. Exactly what you've come to expect from Broan.

THROUGH-WALL FANS

- Housing adjusts to fit walls from 4½"–9½" thick
- Specially designed polymeric fan blade
- Built-in damper minimizes backdrafts for energy efficiency
- Paintable polymeric grilles

- Accessorize with wall switch or variable speed wall control

508 (10"), **509/509S** (8")
- 509S: features an integral ON/OFF rotary switch–no wall switch to wire

512M
- 6" Through-Wall
- Louvered exterior wall cap with built-in bird screen
- 6" diameter flexible aluminum duct included

WALL/CEILING-MOUNT, SIDE DISCHARGE FANS

502, 503
- Installs easily between ceiling joists or wall studs
- Built-in damper prevents backdrafts
- Fits 3¼" x 10" duct

FLEXIBLE, ENERGY-EFFICIENT,
AND ULTRA QUIET

- High efficiency ECM motor lowers the consumption of energy for more savings
- Blower efficiency as high as 8.4 CFM/W
- Constant airflow maintains the selected airflow under any conditions (up to 0.55 in. w.g.)

- Easy installation and service due to small size and light weight
- Super silent ventilation with a sound level of 0.65 @ 130CFM
- High density EPS insulated housing avoids condensation and air leakage
- 5-year parts warranty

High efficiency ECM motor with variable speed and constant airflow
The FIN-180B can be easily installed and used for various applications. The constant airflow gives you peace of mind in knowing the selected airflow will be maintained under any conditions.

THE FRESH IN INLINE FAN CAN BE USED AS A SINGLE OR MULTI-ROOM VENTILATION SYSTEM:
AN EXHAUST FAN
To remove air from a room using a remote mounted fan
A TRANSFER FAN
To move air from one room to another (cooled or heated)
A SUPPLY FAN
To bring fresh air inside the house

THE PERFECT SOLUTION FOR:

Bathrooms, meeting rooms, living rooms or to distribute
heating/cooling from a room with a mini-split or fireplace.

Benefits	Broan FIN-180B
CFM Ranges	Selectable CFM: 30 CFM to 180 CFM (continuous ventilation) by 10 CFM increments
Controls	Button: Speed selection, 8 positions Switch: Range selection 2 positions: Low: 30-100 CFM, High: 110-180 CFM
Damper	Spring loaded magnet
HVI	HVI listed: Published data validated by a third party
ENERGY STAR	1. ENERGY STAR® qualified - unit 2. ENERGY STAR® ready - with optional MERV 8 & 13 filters
ECM Motor	ECM reduces the HERS score compared to a PSC Better fan efficiency
Constant Airflow	Provides an accurate airflow compensation without any measurement Maintain the selected airflow in any condition (Up to 0.55 in. w.g.)
Merv 8 & 13 Filters	MERV 8 and 13 options available
Flexible Installation	Fits in between 12'' center-joist Flush-to-ceiling installation
Ready-to-paint Housing	Yes
Sound Level	Super silent ventilation = 0.65 @ 130CFM
Easy To Install and Service	The door is easy and safe to open (latches)

Would you like to know if FIN-180B could be adapted to a specific application?

Ask your representative and validate with the Code in place in your region. Certain restrictions apply, such as radon, chemical compound and kitchen hood applications. If the unit needs to be installed in a non-conditioned space in the building, the duct needs to be insulated.

Room Inlets
• Models available for 6" (CVG6) or 4" (CVG4) round duct
• Install in ceiling or wall
• Paint to match room décor
• Available in six packs only

Accessories

Model	Description	Ducting/Size	Notes
CVG4	Grille Intake	4"	Round Grille

INSTANT HEAT, RIGHT WHEN YOU NE
AND ONLY WHERE YOU

POWERFUL HEATING, LIGHT AND VENTILATION AT THE TOUCH OF A SWITCH.

No matter where you live your house can become chilled. Maybe it's early fall before the furnace is on, or maybe the cool desert nights mean colder rooms. And there's certainly one room you never want to be chilly—the bathroom. Whether it's taking a morning shower, or relaxing in a whirlpool at the end of a long day, your family appreciates a warm, comfortable bathroom. Broan heater/fan/lights are the perfect solution. You have instant heat to quickly warm up the room, a quiet ventilation fan to remove excess humidity and a convenient light–all in one fixture. Each one can be operated separately, or they can be used simultaneously when needed, no furnace required.

ED IT.
WANT IT.

QT SERIES FEATURES

- Efficient PowerHeat™ heater design
- Choice of standard E26 base (2, 60 watt) lighting (bulbs not included) or energy-efficient 36 watt GU24 fluorescent (bulbs included)
- Fan motor is engineered for continuous operation

- HVI Certified
- Type IC
- Requires a dedicated 20 amp circuit
- Switches sold separately (see guide on pages 48–51)
- 7 watt night-light (bulb not included)
PowerHeat™ is a Broan design that maximizes heat output per watt. With the heater element close to the forced air exit grille, the internal components are not heated. Heat is delivered into the room and does not escape into the ceiling or attic space.

DIRECTIONALLY ADJUSTABLE HEATER/FAN LIGHT FEATURES

- Heater/Fan/Light brings convenient, comforting warmth to your bathroom
- Quiet, high-output heater with exclusive directionally adjustable design (see below)
- 4" ducting for new construction or retrofit
- Multi-function wall switches sold separately (see guide on pages 48–51)

- Choice of Standard E26 base (bulb not included) or energy-efficient 27 watt GU24 (bulb included) fluorescent lighting
- Fan motor is engineered for continuous operation
- HVI Certified
- Type IC
- Requires a dedicated 20 amp circuit
- Fits 2" x 6" ceiling construction

HEATER/FAN & HEATER/FAN/LIGHT FEATURES

- Designer white polymeric grilles complement virtually any décor
- 1300 watt heaters
- Fan, light and heater function independently or together
- Type IC
- Fits 2" x 6" ceiling construction

- Two- or three-function wall controls are available separately (see guide on pages 48–51)
- **655:** 20-amp circuit required
- **659:** 15-amp circuit required
- **656:** Heater/Light Only, 15-amp circuit required
- **658:** Heater/Fan, 15-amp circuit acceptable

BULB HEATER/FAN FEATURES

- Quiet, highly efficient polymeric blower wheels
- Polymeric dampers prevent backdrafts and eliminate mechanical noise
- Polymeric 4" round duct connectors with tapered sleeves simplify ducting
- Operate fan and heater independently or together
- Attractive white polymeric grilles

- Compact steel housings with adjustable mounting brackets with keyhole slots that span up to 24"
- 250 watt R40 or BR40 size infrared bulbs (not included)
- Type IC, UL Listed for 60ºC wiring (retrofits)
- **162:** One-Bulb Heater/Fan
- **164:** Two-Bulb Heater/ Fan, (Two-function control available separately, see guide on pages 50–53)

ONE OR TWO-BULB HEATERS—NO FAN

- Infrared bulbs deliver energy-saving warmth
- Get instant comfort in the bathroom without turning up the central thermostat
- 250 watt R40/BR40 size infrared bulbs (not included)
- Attractive, white polymeric grilles

- Compact steel housings
- Adjustable mounting brackets with keyhole slots span up to 24"
- **161:** One-Bulb Heater, UL Listed for 75ºC wiring

PULL THE HEAT OUT OF YOUR ATTIC.
PUT MONEY BACK IN YOUR WALLET.

Prevent heat and moisture build-up. In summer, attics can reach 150°F or more, warming your living area, increasing the air-conditioning load, and adding to your energy bill. In winter, ice dams can result, and moist air can condense causing mildew, rotting wood and wet insulation. Year-round attic ventilation ensures a cooler, drier attic that can extend roof life by preventing rot, premature aging and shingle distortion. A cooler attic extends the life of your air conditioner and lowers air conditioning expense.

How Much Ventilation Do You Need? Effective ventilation requires air to exit at or near the peak of the roof with replacement air drawn through soffit venting and louvers. The Home Ventilating Institute (HVI) recommends at least 10 air changes hourly to equalize temperature. Determine your attic ventilation needs below, or try the **Attic Ventilation Calculator at broan.com.**

DETERMINE YOUR VENTILATION NEEDS

1. Calculate the volume of your attic, in cubic feet, depending on the style of your home's roof.

Attic Volume for Gable Roof:
Volume = Length x Width x Height x $\frac{1}{2}$

Attic Volume for Hip Roof:
Volume = Length x Width x Height x $\frac{1}{3}$

2. Attic Volume x 10 Air Changes per Hour = Total Cubic Feet per Hour of ventilation recommended.

3. Total Cubic Feet per Hour 60 Minutes/Hour = Cubic Feet Per Minute (CFM) of Ventilation Recommended.

Example: Average Gable Attic Volume = 58$\frac{3}{4}$' x 29' x 7$\frac{1}{4}$' x $\frac{1}{2}$ = 6,176 Cubic Feet
6,176 Cubic Feet x 10 Air Changes/Hour = 61,760 Cubic Feet/Hour ÷ 60 Min./Hour = 1,029 CFM

4. Replacement air is drawn through vents in your soffit. To determine the minimum soffit vent area required (in square inches) multiply the total CFM of your powered ventilator(s) by 0.48. This number is the total square inches of soffit venting required by your powered ventilator(s).

Example: 1,029 CFM x 0.48 = 494 Square Inches of soffit vent area recommended

ACCESSORIES

433

For use with Broan Models 353, 35316, 345GOBK or 345GOWW.

433 Automatic Shutter for Gable Mount Attic Ventilators

- Feature counter-balanced aluminum vanes that automatically open and close when the ventilator turns on and off
- Better air flow than stationary attic louvers
- Extruded aluminum frame fits flush with outside wall
- Weather-tight closure
- Easy to install

† Model 433 Automatic Shutter Accessory sold separately. See page 46.
*Exhaust capacity HVI certified @ .03" static pressure.
**Higher CFM with Model 433 shutter. Lower CFM with standard wood louvre. The Home Ventilating Institute (HVI) recommends 1 sq. ft. of open air inlet per 300 CFM of fan capacity. The best location for these air intake vents is under the eaves with direct access to the attic. Vents for gable installations should be placed at the end of the house opposite the installed ventilator. Failure to provide these intakes could cause natural-draft gas appliances to backdraft.

SOLAR VENTILATION

Surface Mount—345SOBK and 345SOWW

For most roofs, our one piece SPAV is the perfect solution. Because our solar cells are highly efficient at capturing the sun's energy, there is no need for unsightly raised panels or tracking systems. Instead, what you see is a low profile ventilator in a contoured design that integrates well with the roof.

345SOWW (WEATHERED WOOD)

THE PERFECT CONTROL SOLUTION FOR EVERY ROOM AND NEED.

INDICATOR LIGHT CONTROL FOR CONVENIENCE

SINGLE-FUNCTION CONTROLS

Model 69W*
- Single-function
- Ideal for use with quiet models, or Remote In-Line Ventilators
- 120V, 15 amps
- Available in White (W)

INDICATOR LIGHT CONTROLS

Model 269WL, 269VL
- Two-function
- For use especially with quiet models and an auxiliary light source
- Lighted fan control 120V, 20 amps; unlighted 120/240/277V, 15 amps
- Fits two-gang box
- Available in White (W) or Ivory (V)

Model 685WL
- Three-function
- For use especially with quiet models
- Lighted fan control 120V, 20 amps; two additional on/off rocker switches 120V, 15 amps each (20 amps total)
- Fits two-gang box
- Blister packs (P685WL, P685VL)
- Available in White (W) or Ivory (V)

THERMOSTAT AND HUMIDITY CONTROLS

Model 82W
- SensAire® technology responds to humidity up to 70% faster than competitive models; setpoint mode satisfies CA requirements
- Continuous ventilation mode helps to meet ASHRAE 62.2
- Compatible with any existing fan within electrical ratings
- Available in white; faceplate not included
- 120V, 4 amp

Model DH100W*
- Dehumidistat
- Dual voltage (24V/120V)
- Variable setting from 20–80% relative humidity
- Usage guide included
- Fits single-gang box only

MULTI-FUNCTION CONTROLS

Model 66W, 66V, 67W
- Three-function
- Three independent, 120V, 15 amp rocker switches (20 amps total)
- Fits single-gang opening
- Blister packs available (P66W, P66V, P67W)
- Available in White (W) or Ivory (V)
- Wall plates available in: White (66W) or Ivory (66V); Polished chrome finish (67W)

Model 68W, 68V
- Two-function
- Two independent, 120V, 15 amp rocker switches (20 amps total)
- Fits single-gang box
- Blister packs available (P68W, P68V)
- Available in White (W) or Ivory (V)

Model 77DW, 77DV
- Four-function
- Single switch provides three settings for fan sensor (On-Auto-Off) on Sensing models
- Remaining switches for light/night light
- Works with QTX110HL heater/fan/light/night light
- Available in White (W) or Ivory (V)
- Fits single-gang opening
- Blister packs available (P77DW)

*Also for use with Powered Attic Ventilators—see pages 46–47

MULTI-FUNCTION CONTROL TO SUIT EVERY NEED

SPEED CONTROL FOR QUIETER OPERATION OR FULL POWER

HUMIDITY SENSING TO HELP PREVENT FOGGY MIRRORS

SPEED CONTROLS

Model 57W, 57V (3-amp)

- 120V, 3 amps
- Fits single-gang box
- Positive on/off action—dial for variable selection of air speeds and sound levels
- Built-in radio noise suppressor
- Available in White (W) or Ivory (V)
- Blister packs available (P57W)

Model 72W, 72V (6-amp)

- 120V, 6 amps— Models 72W, 72V
- Fits single-gang box only
- Positive on/off action—dial for variable selection of air speeds and sound levels
- Built-in radio noise suppressor
- Available in White (W) or Ivory (V)

TIMER AND OFF-DELAY CONTROLS

Model 59W, 59V, 71V*

- Model 59W, 59V—up to 60 minutes
- Model 71V—up to 12 hours
- Fits single-gang box
- 120V, 20 amps; 240V, 10 amps
- Operate continuously or for any set period
- Available in White (W) or Ivory (V)
- Blister packs available (P59W, P59V)

Model 61W, 61V

- Operate for any set period up to 15 minutes (no "continuous on" position)
- Fits single-gang box
- 120V, 20 amps; 240V, 10 amps
- Available in White (W) or Ivory (V)

Model 62W

- 60 Minute
- Two separate 120V, 15 amp on/off rocker switches (20 amps total)
- 120V, 20 amps or 240V, 10 amp timer
- Timer operates continuously or for any set period up to 60 minutes
- Fits two-gang box
- Available in White (W)

Model 63W, 63V

- 60 Minute
- Separate 120V, 15 amp on/off rocker switch
- Timer operates continuously or for any set period up to 60 minutes
- Fits two-gang box only
- Available in White (W) or Ivory (V)

Model 64W, 64V

- Fan/Light Control with Off-Delay
- Fan and light operate together when control is turned on
- Fan continues to operate for a user adjustable time period 5–60 minutes after light is turned off
- Center position bypasses timer and turns fan and light off immediately
- Fits single-gang box only
- 120V, 4 amps (fan), 4 amps (light)
- Requires hot and neutral wires in the switch box
- Available in White (W) or Ivory (V)

*Also for use with Powered Attic Ventilators—see pages 46–47

[1]Built-in on/off switch. [2]Built-in on/off variable switch

ADAPTERS

Model FY6
- 6" x 6" x 6" Y adapter
DAMPERS

Model 97 Damper
- 7" spring-loaded, in-line damper

Model BP87Q
- 7" vertical discharge damper

DUCTING

Model 406 Round Duct
- 6" round duct
- 2' galvanized section

Model 407 Round Duct
- 7" round duct
- 2' galvanized section

### Model 410 Round Duct
- 10" round duct
- 2' galvanized section

Model 889 Duct
- 3$\frac{1}{4}$" x 10" duct
- 2' galvanized sections

Models DT4C & DT6C Non-Insulated Flexible Duct
- 4" (DT4C) or 6" (DT6C) round
- DT4C is a 4-pack
- 25' standard length

Models DT4W, DT6W & 804DU Insulated Flexible Duct
- 4" (DT4W & 804DU) or 6" (DT6W) round
- 25' standard length

DUCTING KITS

Model RVK1A* Flexible Roof Ducting Kit
- Includes Model 636 Roof Cap
- 4" diameter metal duct connector
- 2 duct clamps
- 4" to 3" reducer
- 8' of 4" flexible aluminum ducting

Model WVK2A* Flexible Wall Ducting Kit
- Includes white polymeric wall cap
- 4" diameter metal duct connector
- 2 duct clamps
- 4" to 3" reducer
- 5' of 4" flexible aluminum ducting

ELBOWS

Model 415 Adjustable Elbow
- Fits 7" round duct

Model 418 Adjustable Elbow
- Fits 10" round duct
Model 419 Adjustable Elbow
- Fits 6" round duct

Model 428 Vertical Elbow
- Fits 3$\frac{1}{4}$" x 10" duct

Model 429 Horizontal Elbow
- Fits 3$\frac{1}{4}$" x 10" duct

Model 430 Short Eave Elbow
- For 3$\frac{1}{4}$" x 10" duct
- Includes backdraft damper and grille (black)
- Only recommended for fans with more than 160 CFM

### Model 431 Long Eave Elbow
- For 3$\frac{1}{4}$" x 10" duct
- Includes backdraft damper and grille (black)
- Only recommended for fans with more than 160 CFM

Model 839 Elbow
- 90° turn
- For use with 3$\frac{1}{4}$" x 10" duct
FILTERS

Model 834 Filter
- For 8" fans

Model 854 Filter
- Aluminum mesh grease filter
- For 10" fans

Model 99010042 Aluminum Filter
- Fits Utility Ventilator Models 503, 503MG, 505, 505MG, 509, 509MG, 509S and 509SMG

Model 99010271 Aluminum Filter
- Fits Utility Ventilator Models 12C, 12CMG, 502, 502MG, 504, 504MG, 508, 508MG, 510, 510MG, 511 and 511MG

METAL GRILLE KIT

Model 97011308
- Steel baked white enamel finish
- Fits fan Models 670, 671, 676, 684, 688 and 689
- Grille size is 10$\frac{1}{4}$" square

ROOF CAPS

Model 437* 10" Round
- High-capacity design up to 1200 CFM
- Backdraft damper and built-in bird screen
- Steel housing, black electrically bonded epoxy finish
Model 611 Roof Cap*
- For flat roof installation
- Aluminum natural finish
- For up to 8" round duct
Model 611CM Roof Cap*
- For curb mount installation
- Other features same as Model 611

Model 612 Roof Cap*
- For flat roof installation
- Aluminum natural finish
- For up to 12" round duct

Model 612CM Roof Cap*
- For curb mount installation
- Other features same as Model 612

Model 634 Roof Cap*
- For 3$\frac{1}{4}$" x 10" or up to 8" round duct
- Black
- Backdraft damper and birdscreen

*Not for use with dryers.

ROOF CAPS CONTINUED

Model 634M Roof Cap*
- Same as Model 634 except for 6" round duct

Model 636 Roof Cap*
- For 3" or 4" round duct
- Built-in backdraft damper and bird screen
- Steel baked black enamel finish
Model 636AL Roof Cap*
- Same as Model 636, except aluminum natural finish

Model 644 Roof Cap*
- Same as Model 634, except for aluminum natural finish
SLEEVES

Model CVLD4
- 4" sleeve with damper
Model CVLD6
- 6" sleeve with damper

TRANSITIONS

Model 886 Transition
- Converts 7" round to 3¼" x 10" duct
Model 475 Transition
- Converts 6" round duct to 4" round duct reducer
- Available in 6 Pack (475B)
Model 413 Transition
- Converts 3¼" x 10" duct to 8" round duct

Model 403B Transition
- 3–4" duct increaser

Model 405B Transition
- 4–8" duct increaser

Model 463B Transition
- 3–4" duct expander

Model 465B Transition
- 4–5" duct expander

WALL CAPS

Model 613 Wall Cap*
- For 12" round duct
- Built-in backdraft damper and bird screen
- Aluminum natural finish
Model 639 Wall Cap*
- For 3¼" x 10" duct
- Spring-loaded backdraft damper
- Built-in bird screen
- Steel baked black enamel finish
Model 641 Wall Cap*
- For 6" round duct
- Built-in backdraft damper and bird screen
- Aluminum natural finish
- Model 647 for 7" Round duct
Model 647 Wall Cap*
- For 7" round duct
- Other features same as Model 641

Model 649 Wall Cap*
- Same as Model 639, except aluminum natural finish
Model 843BL Wall Cap*
- For 6" round duct
- Built-in backdraft damper and bird screen
- Black finish
WALL CAPS CONTINUED

Models 885AL and 885BL Wall Cap*
- For 3" or 4" round duct
- 4" to 3" transition included
- Aluminum natural finish (885AL) and steel black enamel finish (885BL)
- Standard package—6 to a carton
- Built-in bird screen and damper
Model 642
- For 4" round duct
- Aluminum natural finish
- 4 to a carton

Model 643 Wall Cap*
- For 8" round duct
- Aluminum natural finish
- Backdraft damper, no birdscreen
Model 646 Louvered Wall* Cap for 6" Round Duct
- Single pack
- White polymeric
Model WC650 Wall Cap*
- For 4" round duct
- White polymeric
- 4 to a carton

*Not for use with dryers.

TECHNICAL

What is a sone, and how is it measured? A sone is a measurement of sound of how sound is sensed. The lower the sone value, the quieter the listening environment. One sone is the equivalent of a quiet refrigerator. Broan fans feature the quietest rating possible at <0.3 sones as tested for HVI certification.

What does "HVI certified" mean? The Home Ventilating Institute (HVI) is an independent organization that certifies the airflow and sound performance of Broan products. For more information visit **www.hvi.org**.

What is ENERGY STAR®? Refer to the product matrix for specific Broan fans that meet ENERGY STAR® requirements. Many of these Broan products use high efficiency motors and lighting to reduce energy consumption by as much as 70%. Learn more about ENERGY STAR® at **www.energystar.gov**.

What does CFM mean? Cubic Feet per Minute (CFM) is the measure of air volume moved by the fan blower. Choose a fan with a CFM rating appropriate for your room size to ensure adequate ventilation.

What does "static pressure" mean? Static pressure is the measurement of airflow resistance as it is pushed through ductwork which reduces the effectiveness of the fan. Learn more on the Home Ventilating Institute website **www.hvi.org.**

What is whole-house ventilation? Whole-house ventilation provides today's airtight homes with a relatively constant and controlled lower level of ventilation. Broan offers many virtually silent continuous ventilation solutions for ASHRAE 62.2 and programs such as LEED, ENERGY STAR® for Homes and CA Title 24.

OPERATION

How do I size a fan properly for my room size and the duct run? See the sizing guidelines on page 57 for details on proper sizing. This section provides an explanation and examples to help you make the right decision.

How long should a bath fan run after a shower is used? The Home Ventilating Institute recommends that a fan should be left on for 20 minutes more to clear humidity adequately and to ensure moisture and condensation is minimized.

How does Sensing Technology operate? Broan has unique sensing technology that detects humidity or motion. Multi-speed models automatically turn the fan speed up when someone enters the room or there is a rapid rise in the humidity level from the lower continuous CFM level. Single-speed models turn the fan on automatically.

How does the delay-off timer operate? Delay-off timers automatically shut the fan off after a time interval set by the user.

Why do the windows and mirrors fog even when the fan is running? If windows and mirrors are very cold, condensation can still form on these surfaces. And if your bathroom is sealed tightly, replacement air may not be entering the room fast enough to displace the moist air. Fan placement can also be a factor. Your fan should be located far from the replacement air source to ensure the moist air is drawn out first. Finally, make sure your ductwork is as short and straight as it can be in order to ensure proper air outflow.

**Why is water dripping from the grille of the fan?** Dripping water is either condensation (usually due to cold ductwork or improper duct installation), or a problem with the seal on a wall or roof vent. Insulated ductwork can help solve condensation problems, and running the fan longer will ensure moisture is completely removed from the duct.

Will Broan fans work in wall-mount applications? Refer to the product matrix for specific Broan bath and utility fans that may be wall mounted.

What type of exhaust fan is best for a sauna or hot tub area? High CFM-rated devices are normally recommended for this type of application.

Can I use a fan in a steam shower? No. Since these are normally sealed chambers, a vacuum will be created.

Can I mount Broan fans above my tub and shower? Most Broan fans are rated for use over a shower or bathtub with a GFCI (Ground Fault Circuit Interrupter).

Can my bath fan be surrounded by insulation? Yes. Broan bath fans are designed to provide adequate cooling for motors and lighting, as well as products with integral heaters.

Can I vent more than one bath fan out of a roof or wall cap? No. Always follow the manufacturer's recommended ventilation requirements.

What is the Broan Ventilation fan warranty? Go to **http://www.broan.com/warranty** for this information.

Do I need attic access to install a fan in a retrofit situation? Refer to the product matrix for specific Broan fans that may be installed without access from above with features such as telescoping mounting frames, snap-in housings, bendable mounting ears, drywall-mounting tabs and inside-out mounting duct connectors. Room-side retrofit installations are now a reality.

Can I install a heater over the bathtub or in a shower? No. Heaters are not UL Listed (Underwriter's Laboratory) for installation over a bathtub or in a shower.

Can I use an inline or multi-port fan in one large bathroom? Yes, this works the best for large rooms because you can install the ports over the areas where the ventilation is needed the most (source control). The size of the multi-port would be determined by the size of the room.

Can larger diameter ducting be used with my bath fan? Yes, larger diameters will result in improved performance.

Can I use a smaller diameter duct than what the fan is designed for? This is not recommended. It will cause the fan to run harder, greatly reducing the CFM performance of the fan and create excess noise.

What type of duct is recommended, rigid or flexible? It is recommended, where possible, to use rigid duct. It has less resistance to air flow and allows the fan to operate much more efficiently. If flexible duct is used, be sure the duct is as straight as possible.

Can I exhaust my fan into my attic instead of out the roof or wall? Never exhaust air into spaces within walls, ceilings, attics, crawl spaces or garages. Humidity may damage the structure and insulation.

Where should the exhaust fan be located? Exhaust fans should be located in or near the shower or tub, and in an enclosed water closet. Keep exhaust points opposite the supply air source to ensure that the fresh air is drawn through the room. Bathroom doors should not be sealed too tightly at the bottom in order to allow "makeup air" to enter the room when the door is closed.

In what direction should I orient the exhaust outlet? The exhaust outlet is the point where air is discharged through the body of the fan housing into the ductwork. During installation, orient your fan with the exhaust outlet pointing toward the exit vent on your roof or wall to minimize turns in ductwork that impede airflow.

Will a bath fan or wall-mount utility fan serve as a range hood? No. Range hoods are specifically designed to handle grease and high temperature environments. Broan bath fans supplement odor and moisture removal in the kitchen, but are not intended for use as a range hood.

Can I use CFL or LED bulbs in fan/lights with E26 screw-base sockets? Yes, if key guidelines are followed. Go to broan.com FAQs for details.

PROPER INSTALLATION MAKES ALL THE DIFFERENCE.
Tape or caulk around the seam where the fan housing meets the sheetrock on the ceiling

If possible, use smooth, rigid ductwork as large as the exit opening on the body of the fan housing

Whenever possible, ductwork should slope down and away from the fan housing to direct any condensation toward the vent

Whether rigid or flexduct, the turning radius for the duct should be as large as possible

Pre-installed screws, keyhole slots and alignment tabs facilitate installation, taking the guesswork out of proper mounting.

Elbows, turns, long ducts and ductwork smaller than the fan's exit outlet will reduce performance.

Use wide aluminum foil or duct tape to join smooth metal ductwork seams.

Do not let flexible ductwork sag as this impedes airflow.

During installation, orient the bath fan outlet in the direction of the home's exit point to minimize duct turns.

Before adding an elbow or bend, allow 24" to 36" of straight run from the fan outlet point.

Duct-wrap insulation (R-5 or above) will help minimize condensation in cold climates, especially on long duct runs.

Quick guideline: For bathrooms up to 100 square feet, the HVI recommends ventilation of at least 1 CFM per square foot (about eight air changes per hour). For bathrooms over 100 square feet, add up the needs of each fixture to determine the total ventilation rate:

- Toilet 50 CFM
- Shower 50 CFM
- Bathtub 50 CFM
- Jetted tub 100 CFM

Exit vents should have backdraft flaps to help keep cold air from entering the duct

EASY STEPS FOR CHOOSING AND SIZING THE RIGHT VENTILATION FAN FOR YOUR HOME.

Determine which rooms could use ventilation, and how much is needed. Spot ventilation is used in localized areas to remove moisture, odor and airborne pollutants quickly. Most commonly used in the bath or powder room, spot ventilation can also be used in a laundry room, exercise area, closet, or bedroom, wherever air should be changed frequently. Decorative and recessed models can be ideal solutions for these situations. According to the Home Ventilating Institute (HVI), Air Changes per Hour (ACH) for comfortable and healthy living should be as follows: Bathrooms: 8 changes, Kitchens: 15 changes, Living/Bedrooms: 6 changes. Broan bath fans, utility fans and high capacity fans can meet these needs.

Calculate the air movement necessary for proper ventilation. Air movement is measured in Cubic Feet per Minute (CFM). To determine CFM requirements, first determine the size of your room. Measure and multiply the length, width and ceiling height of your room to determine cubic footage. Then use the multiplication factor of .13 and round up to the next "ten." See the three examples that follow.

Example 1:
Bathroom with 8' ceiling:
7' wide x 9' long x 8' high x .13 = 66. Select a bath fan with at least 70 CFM

Example 2:
Bathroom with 9' ceiling: 10' wide x 9' long x 9' high x .13 = 105. Select a bath fan with at least 110 CFM

Example 3:
For a bathroom with a vaulted ceiling, use the average ceiling height at the wall and the peak:8' wide x 12' long x ((8' at wall + 12' at peak) / 2 = 10') average height x .13 = 125. Select a fan(s) with at least 130 CFM

Account for long duct runs and ductwork that turns before it reaches the exterior vent. When airflow is restricted in any way it slows down. Just as a car must slow down for a sharp corner, air decelerates when going through a turn in a duct run. Whenever possible, create a straight duct run with large radius turns, if they're necessary at all. Rigid ductwork is optimal because airflow restriction is minimized. Flexible tubing may be convenient to install, but resistance is created as air is moved over the spiral metal frame of the tubing. With long duct runs or ducts with multiple turns the fan works harder, noise increases and fan performance (CFM) is compromised. Select a fan model with an even greater CFM rating to compensate.

6" ducting overcomes most performance-related installation issues. Broan's ULTRA Green and QT Series fans deliver high performance in virtually any real-world installation. They are engineered with a 6" duct connector for peak air movement and extremely quiet operation, even when the duct run is not short and straight.

HIGH
NEED HIGH

-TRAFFIC ENVIRONMENTS
PERFORMANCE VENTILATION.

LOOKING FOR AN EXCEPTIONALLY QUIET SOLUTION TO LIGHT COMMERCIAL VENTILATION? With their heavy-duty motors, Broan High Capacity Ventilation Fans are the perfect answer for ventilating conference rooms, dining areas, public restrooms and other heavily-trafficked spaces. Low-vibration and low-profile, these discrete products work quietly and powerfully behind the scenes to remove odor, humidity and air-borne particulates that affect indoor air quality.

100/150 CFM FEATURES

• 6" round metal duct connector
• Single, impact-resistant centrifugal blower wheel housing
• 20 gauge galvanized steel housing
• Duct horizontally, vertically, or in-line with a separate adapter
• Low profile, white polymeric or painted white enamel metal grille
• Models L100L and L150L are UL Listed for use over bathtubs or showers when connected to a GFCI branch circuit
• Model 80L Variable Speed Control adjusts blower speed and sound level (available separately)

200/250/300 CFM FEATURES

• 8" round metal duct connector
• Single, impact-resistant centrifugal blower wheel (Model L300KMG has a metal wheel)
• 20 gauge galvanized steel housing
• Duct horizontally, vertically, or in-line with a separate adapter
• Models L200L, L250L and L300L are UL Listed for use over bathtubs or showers when connected to a GFCI branch circuit
• Model 80L Variable Speed Control adjusts blower speed and sound level (available separately)

SPECIAL FEATURES FOR

Model L300KMG
• Removable access panel; Suitable for kitchen use
• 8" round duct connector

Models L100L, L150L
• Removable access panel, no insulation
• Two 6" round duct connectors
• No grille

Models L200L L250L, L300L
• Suitable for kitchen installations
• Removable access panel, no insulation
• Two 8" round duct connectors

IN-LINE VENTILATORS**
MODEL 80L

• Adjust ventilation easily in any room
• Variable Speed Control mounts inside the fan housing and allows blower speed adjustment
• For Broan High Capacity Fans L100–L900
• Speed control with metal housing
• Fan insulation is perforated for easy installation
• 120V, 3 amps, 60 Hz

**80L
VARIABLE SPEED CONTROL**

400/500/700 CFM FEATURES

- 4½" x 18½" duct connector
- Two impact-resistant centrifugal blower wheels
- Duct horizontally or vertically—In-line available with separate adapter
- Quiet automatic backdraft dampers

- Variable Speed Control adjusts blower speed and sound level (available separately)
- Models with "K" suffix suitable for kitchens
- Not for use over tub or shower

Models L400L, L500L, L700L
- Removable access panel; no insulation

Model L400K
- Suitable for kitchens

Static Pressure (In. WG) vs Airflow Rate (CFM)

For In-line models, performance listed is for straight-through ducting at .125" static pressure.
For complete Sones and CFM at other static pressures, see our Web site at www.Broan.com.

ROOF CAPS

Model 437
- High-capacity design up to 1200 CFM
- Built-in bird screen
- Steel housing, black electrically bonded epoxy finish
Model 611
- For flat roof installation
- Aluminum natural finish
- For up to 8" round duct

Model 611CM
- For curb mount installation
- Other features same as Model 611

Model 612
- For flat roof installation
- Aluminum natural finish
- For up to 12" round duct

Model 612CM
- For curb mount installation
- Other features same as Model 612

Model 634
- For 3$\frac{1}{4}$" x 10" or up to 8" round duct
- Built-in backdraft damper and bird screen
- Steel housing, black electrically bonded epoxy finish

Model 634M
- Same as Model 634, except for 6" round duct

Model 644
- Same as Model 634, except aluminum natural finish

## GREASE FILTERS

Models LAF1 & LAF2
- Aluminum mesh filter traps grease and protects motor
- Dishwasher safe
- LAF1 (12" x 12") for L100/150/200/250/300 Series
- LAF1 for use with metal grilles
- LAF2 (12" x 21$\frac{1}{4}$") for L400/500 Series

WALL CAPS

Model 441
- For 10" round duct
- Steel with aluminum louvers

Model 613
- For 12" round duct
- Built-in backdraft damper and bird screen
- Aluminum natural finish

Model 641
- Same as Model 613, except for 6" round duct

Model 643
- For 8" round duct
- Built-in backdraft damper
- Aluminum natural finish

Model 843BL
- For 6" round duct
- Built-in backdraft damper and bird screen
- Black finish

IN-LINE ADAPTERS

Model 961L
- For L100/L150 Series
- Galvanized steel
- 6" round duct intake

Model 981L
- For L200/L250/L300 Series
- Galvanized steel
- 8" round duct intake

Model 982L
- For L400/L500/L700 Series
- Galvanized steel
- 4$\frac{1}{2}$" x 18$\frac{1}{2}$" duct intake
Model 983L
- For L900/L1500 Series
- Galvanized steel
- 8" x 12" duct intake

DUCT TRANSITIONS

Models 423 & T81212
- Galvanized steel
- 423: (4$\frac{1}{2}$" x 18$\frac{1}{2}$" to 10" round)
- T81212: (8" x 12" to 12" round)

VIBRATION DAMPENING HANGERS

Model V104 (not shown)
- For Model L2000L
- Heavy gauge steel construction
- Neoprene vibration dampening cushion
- Maximum load 75 lbs (each)
- For $\frac{3}{8}$" diameter threaded rod (available separately from others)
- Set of four required for each ventilator

METAL GRILLE KIT

Model MG1
- For L100/150/200/ 250/300 Series
- White enamel painted steel
- Mounting screws included
RADIATION DAMPERS

When excessive heat is detected, the breakaway fusible link triggers the closing of the radiation damper's fire resistant screen to prevent smoke and fire from traveling through ductwork.

Features
- 165° fusible link
- Galvanized steel frame
- Stainless steel negator-type closure spring

High Capacity Models RD1, RD2, RD3 (not shown)
- UL rated 3-hour ceiling radiation dampers
- High temperature, non-asbestos, reinforced fiber thermal fabric
- RD1 (12$\frac{1}{2}$" x 12$\frac{1}{2}$") for L100/150/200/250/300 Series
- RD2 (21$\frac{3}{4}$" x 12$\frac{1}{2}$") for L400/500/700 Series
- RD3 (22$\frac{1}{4}$" x 18$\frac{1}{4}$") for L900/1500 Series

WALL CONTROLS

REMOTE IN-LINE VENTILATOR ACCESSORIES

Model DH100W

- Dehumidistat
- Dual voltage (24V/120V)
- Variable setting from 20–80% relative humidity
- Usage guide included

DECORATOR WALL CONTROLS

Model 69W

- Single-function
- 120V, 15 amps
- Available in White (W)

SPEED CONTROLS

Model 57W, 57V 3-Amp

- 120V, 3 amps
- Fits single-gang box
- Positive on/off action—dial for variable selection of air speeds and sound levels
- Built-in radio noise suppressor
- Blister packs available (P57W)
- Available in White (W) or Ivory (V)

Model 72W, 72V 6-Amp

- 120V, 6 amps
- Same features as 57W/57V
- Available in White (W) or Ivory (V)

TIMER & OFF-DELAY CONTROLS

Model 64W, 64V

- Fan/Light Control with Off-Delay
- Fan and light operate together when control is turned on
- Fan continues to operate for a user adjustable time period 5–60 minutes after light is turned off
- Center position bypasses timer and turns fan and light off immediately
- Fits single-gang box
- 120V, 4 amps (fan), 4 amps (light)
- Requires hot and neutral wires in the switch box
- Available in White (W) or Ivory (V)

Model 80L

- For Broan High Capacity Fans L100–L900L
- Speed control with metal housing
- Fan insulation is perforated for easy installation
- 120V, 3 amps, 60 Hz
- cUL Listed

TWO-FUNCTION CONTROLS

Model 68W, 68V

- Two-function
- Two independent, 120V, 15 amp rocker switches (20 amps total)
- Fits single-gang box
- Blister packs available (P68W, P68V)
- Available in White (W) or Ivory (V)

TIMER & OFF-DELAY CONTROLS

Model 59W, 59V, 71V

- Model 59W, 59V—up to 60 minutes
- Model 71V—up to 12 hours
- Fits single-gang box
- 120V, 20 amps; 240V, 10 amps
- Blister packs available (P59W, P59V)
- Operate continuously or for any set period
- Available in White (W) or Ivory (V)

Model 61W, 61V

- Operate for any set period up to 15 minutes (no "continuous on" position)
- Other features same as 59W/59V
- Available in White (W) or Ivory (V)
