## Getting to know your thermostat

- ② Glow in the Dark Light Button
- ③ Fan Switch
- ④ System Switch
- ⑤ Easy Change Battery Door
- ⑥ Temperature Setpoint Buttons

### ① LCD

Displays the user selectable setpoint temperature.

System operation indicators: The **COOL**, **HEAT** or **FAN** icon will display when the **COOL**, **HEAT** or **FAN** is on. NOTE: The compressor delay feature is active if these icons are flashing. The compressor will not turn on until the 5 minute delay has elapsed.

**Low Battery Indicator:** Replace batteries when indicator is shown.

Indicates the current room temperature.

### Important:

The low battery indicator is displayed when the AA battery power is low. If the user fails to replace the battery within 21 days, the screen will only show the low battery indicator but maintain all functionality. If the user fails to replace the batteries after an additional 21 days (days 22-42 since first "low battery" display) the set points will change to 55°F(Heating) and 85°F(Cooling). If the user adjusts these setpoints away from these it will hold for 4 hours then return to either 55F or 85F. After day 42 the batteries must be replaced immediately to avoid freezing or overheating because the thermostat will shut the unit off until the battery is changed.

## Battery door information

Use the finger bevel on the lower portion of the side of the thermostat to open the easy access battery door.

Replace with 2 AA Alkaline batteries.

Simple operating instructions are found on the back of the battery door.

## Easy to use controls

**① LCD Display:**

See page 2 for details about this display read out.

**② Glow in the Dark Light Button:**

The glow in the dark light button will self illuminate for several hours after exposure to ambient light. This button turns on the display light when pressed.

**Caution:**

When the battery icon  appears replace your AA batteries immediately. Failure to do so may result in your heating & cooling system becoming inoperable.

**③ Fan Switch:**

Select **ON** or **AUTO**. **ON** will run the fan continuously. **AUTO** will cycle the fan on only when the heating or cooling system is on.

**④ System Switch:**

Selects the operation mode of your HVAC system. Selecting **HEAT** turns on the heat mode. Selecting **COOL** turns on the air conditioning mode. Selecting **OFF** turns both heating and cooling off.

**⑤ Temperature Setpoint Buttons:**

Press the + or - buttons to select the desired room temperature.
