COMFORT

THAT KEEPS EVERYONE HAPPY

The Rheem® *Classic*® Series Air Conditioner offers the solid technology and energy-saving performance you've come to expect from Rheem. It's also quiet, so you won't give your indoor home comfort a second thought.

RA17 Classic Series
Efficiencies up to: 17 SEER / 13 EER

Quiet and Efficient

Our new air conditioners are designed to perform both efficiently and quietly, delivering home comfort you can count on when you need it most.

Increased Comfort

The Two-Stage Copeland Scroll™ UltraTech™ compressor provides more precise temperature control and humidity levels for increased comfort.

Exceptional Quality and Reliability

Our *Classic* Series includes features that help fight corrosion, reduce leaks and enhance the overall strength of your air conditioner so you can be confident in the way it performs.

We Thought of Everything... And Then Some

The Rheem® Classic® Series Air Conditioners were developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Rheem Air Conditioning unit to bring you and your family years of comfort.

Count on Staying Cool and Comfortable

A smart, efficient design makes the Rheem Classic Series Air Conditioner one of your best options for staying cool inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient and reliable indoor comfort.

Reliable and legendary performance

The **1 Two-Stage Copeland Scroll™ UltraTech™ compressor** makes the Classic Series as efficient as it is durable. A Single-Stage unit runs at one speed, but the Two-Stage RA17 modulates between two speeds—high and medium. It will operate on medium speed most of the time, providing more precise temperatures and lower humidity while also reducing energy use. The system only operates on high when necessary during peak, warm weather conditions. The compressor also has 70% fewer moving parts—which means you get a unit that's more efficient and more reliable. The **2 optimized fan orifice** contributes to quieter operation, optimal airflow and better overall performance. Simply put, you get efficient comfort that lasts a very long time.

A quieter and more durable unit

It starts with our smart new **3 composite base pan**. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure that the base pan stays looking new for years to come. Our improved refrigerant tubing design also contributes to a quieter, more reliable operation. For added strength, **4 curved louver panels** and **5 rugged corner posts** on the exterior do an excellent job of protecting the inside.

Curb appeal

Looks are not lost on our new Classic Series. Our air conditioners look as good as they operate. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting professional finish.

Fast and accurate installation and maintenance

Your savings start with the installation of your new unit. Our Classic Series Air Conditioners are built to go in fast and easy. The control box is also easy to access, and a roomy diagnostic service window means maintenance calls go quickly, saving you time and money.

Benefits At-A-Glance

Cooling Efficiency:
Up to 17 SEER / 13 EER

Sound Level:
Features like our smart new composite base pan contribute to quieter operation

Available Sizes:
2,3,4 and 5 ton

Compressor:
Two-Stage Copeland Scroll UltraTech compressor for enhanced comfort and greater efficiency

Limited Warranty²:
Conditional parts – 10 years
