ORDERING, STOCKING AND NOTE EXPLANATIONS

Ordering Instructions:

When ordering a replacement part, be sure to read all notes and symbol notations on the parts list. In some cases, it is necessary to determine the unit style number and/or serial number in addition to the model number before selecting a replacement part. When ordering painted cabinet parts, the order **must specify** unit model number, serial number, and paint color. Also, your order can be processed more rapidly if you show the part number and description. Once the product is out of current production, price and availability will vary.

Replacement Parts Stocking Information:

As a general rule, most parts are in stock or have a short order period as long as the product is in current production. Once the product is out of current production price and availability will vary.
