UNIT FEATURES & BENEFITS—RQNM/RQPM- SERIES

The RQNM & RQPM series of Package Heat Pumps are designed to be the most efficient, quickest to install, easiest to service, and most reliable units in the industry - while still maintaining an affordable price. This platform provides you with a full line of nominal capacities from 2 through 5 tons. RQNM models are 13 SEER and RQPM models are 14 SEER, each ARI-certified.

As with all units offered by Rheem, we started our design process with input from the customer. From fan grille to the base rails, Rheem has combined 30 years worth of package unit design experience with input from Dealers to meet the latest application requirements.

Starting at the bottom, the base rails (1) allow for separation between the unit base and the ground level, protecting the base from ground moisture and providing air circulation around the unit. Constructed from sturdy 18-gauge G-90 sheet metal, the base rails also allow for easier maneuverability during installation. In some instances, installers may choose to remove the base rails to allow for the lower installation clearances encountered in some homes. Once the base rails are removed, though, the base of the unit is still positioned above the pad by a shorter secondary base rail (2).

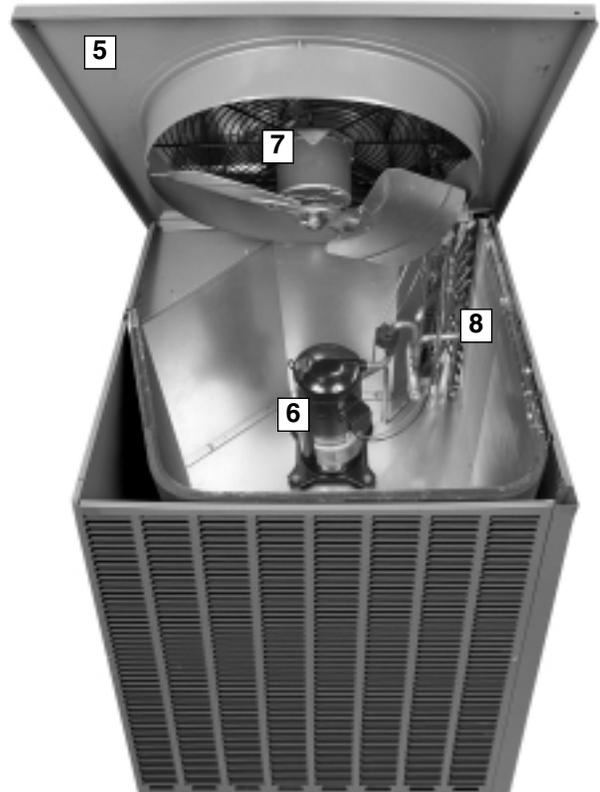

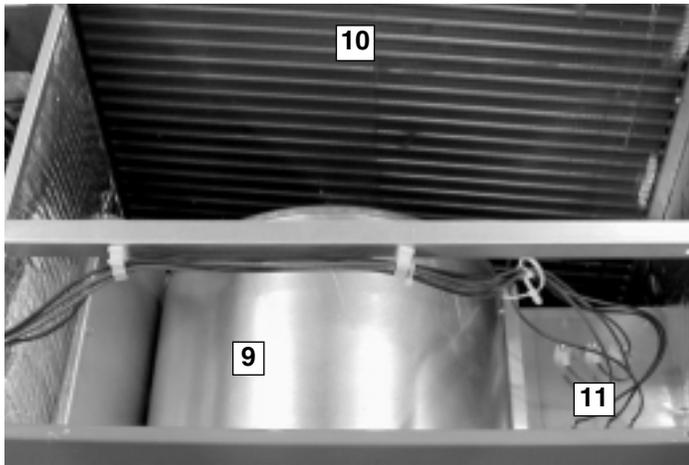

While other manufacturers have chosen to use pre-painted steel in their equipment, which exposes raw edges and invites rust and sharp edges, Rheem package equipment uses a powder-coat paint system, rated at 1000 hour salt spray per ASTM B117. The powder-coat process also greatly diminishes and dulls sharp edges, reducing the occurrence of cuts and torn clothes.

To provide flexibility in space-limited installations, the unit can be installed flush to the structure without blocking airflow over the outdoor coil or making any screws inaccessible for maintenance. Furthermore, the cabinet is a slim 33" wide. Full-louver coil protection (3) makes Rheem unique in the industry and also totally protects the outdoor coil from vandalism and weather extremes.

Two round 14" duct collar (4) are included with the unit, which makes attaching duct a snap. The collar is crimped around the leading edge, making it easier to install duct onto the collar. A metal bead around the circumference prevents the attached ducting from sliding off after installation.

Keeping service technicians in mind, Rheem takes pride providing easy access to internal components. The outdoor-section top cover (5) is easily removed to allow access to the the scroll compressor (6), outdoor fan motor (7), and refrigerant tubing (8).

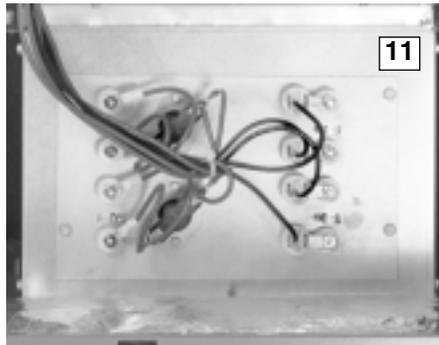

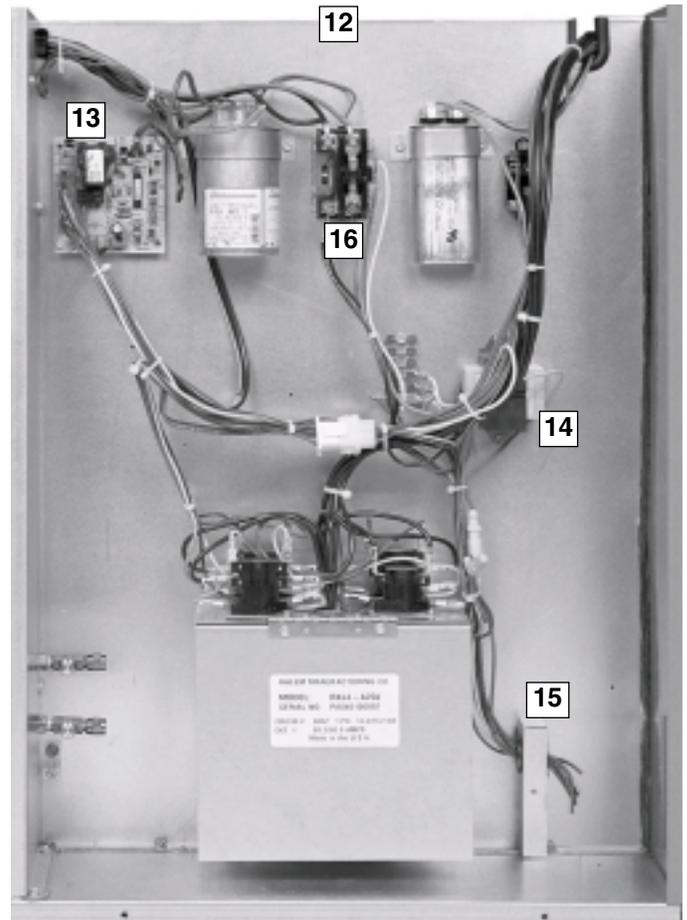

The indoor-section top cover also easily opens to access the removable blower housing and motor (9). This also gains total access to the indoor coil for cleaning and service (10).

The indoor motor and blower system will achieve nominal 400 CFM per ton up to a minimum of .8 inches of static pressure, which helps to eliminate customer dissatisfaction over poor airflow brought about by high-static duct designs.

Optional electric heat (11) can be easily installed in the field, with either dual- or single-point power, and is designed to easily install into the unit. Electric heat can also be specified as factory installed.

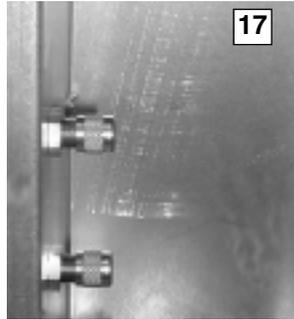

The controls are located in a large, easy-to-access control box (12), which provides plenty of space in which to troubleshoot. A demand defrost control (13) is used to manage the defrost cycle. The transformer (14) is protected by a in-line fuse, which protects the transformer during a low-voltage electrical short. The low-voltage (15) and high-voltage (16) wiring connections are easily accessed and have ample room around which to maneuver. Troubleshooting is further aided with number- and color-coded wiring, which corresponds with the large, easy-to-read wiring diagram located on the inside of the control box access panel.

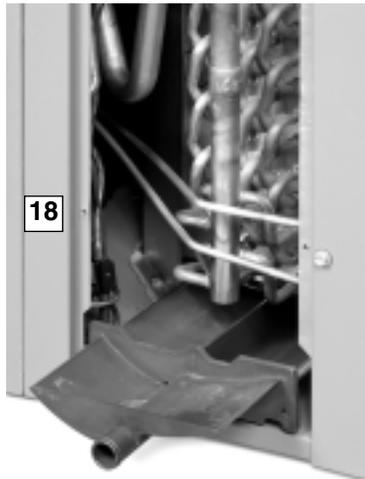

High and low pressure can easily and accurately be measured using the two gauge ports (17) located inside the control box.

Foil-faced insulation is securely glued and captured to the cabinet. On the base of the unit, closed-cell insulation is used to prevent moisture from being absorbed and help reduce mold content to provide better indoor air quality.

For reliability and long-lasting operation, Rheem uses 100% scroll compressor technology (20) on all package platforms. With over 12 years of history, the scroll compressor has proven to be reliable, efficient, and quiet during operation.

A small side panel grants access to a removable, sloped drain pan (18), which helps to ensure indoor air quality (IAQ) throughout the life of the unit. A 3/4" drain trap (19) assembly is provided for convenience.

MODEL IDENTIFICATION—RQNM/RQPM- SERIES

R Q N M — A 036 J K 010

Heating Capacity (Factory Installed)

- 000 = No Resistance Heat
- 005 = 05 KW Resistance Heat
- 007 = 07 KW Resistance Heat
- 010 = 10 KW Resistance Heat
- 015 = 15 KW Resistance Heat
- 020 = 20 KW Resistance Heat

Drive Package
K = Direct Drive

Electrical Designation
J = 208-230V—1PH—60 Hz
C = 208-230V—3PH—60 Hz
(13 SEER Only)

Nominal Cooling Capacity (BTUH) [kW]

- 024 = 24,000 [7.03]
- 030 = 30,000 [8.79]
- 036 = 36,000 [10.55]

NOTES:

1. Cooling Performance is rated at 95° F ambient, 80° F entering dry bulb, 67° F entering wet bulb. Gross capacity does not include the effect of fan motor heat. ARI capacity is net and includes the effect of fan motor heat. Units are suitable for operation to $\pm 20\%$ of nominal cfm. Units are certified in accordance with the Unitary Air Conditioner Equipment certification program, which is based on ARI Standard 210/240 or 360.
2. EER and/or SEER are rated at ARI conditions and in accordance with DOE test procedures.
3. Heating Performance is rated at 47° F ambient, 70° F entering dry bulb for High Temp rating and 17° ambient, 70° F entering dry bulb for Low Temp rating. Performance ratings do include the effect of fan motor heat.
4. Outdoor Sound Rating shown is tested in accordance with ARI Standard 270.

DR —Depression ratio
dbE—Entering air dry bulb
wbE—Entering air wet bulb

Total —Total capacity x 1000 BTUH
Sens —Sensible capacity x 1000 BTUH
Power—KW input

NOTES: ① When the entering air dry bulb is other than 80°F [27°C], adjust the sensible capacity from the table by adding $[1.10 \times \text{CFM} \times (1 - \text{DR}) \times (\text{dbE} - 80)]$.

[] Designates Metric Conversions

LINE VOLTAGE
-FACTORY STANDARD
-FACTORY OPTION
-FIELD INSTALLED

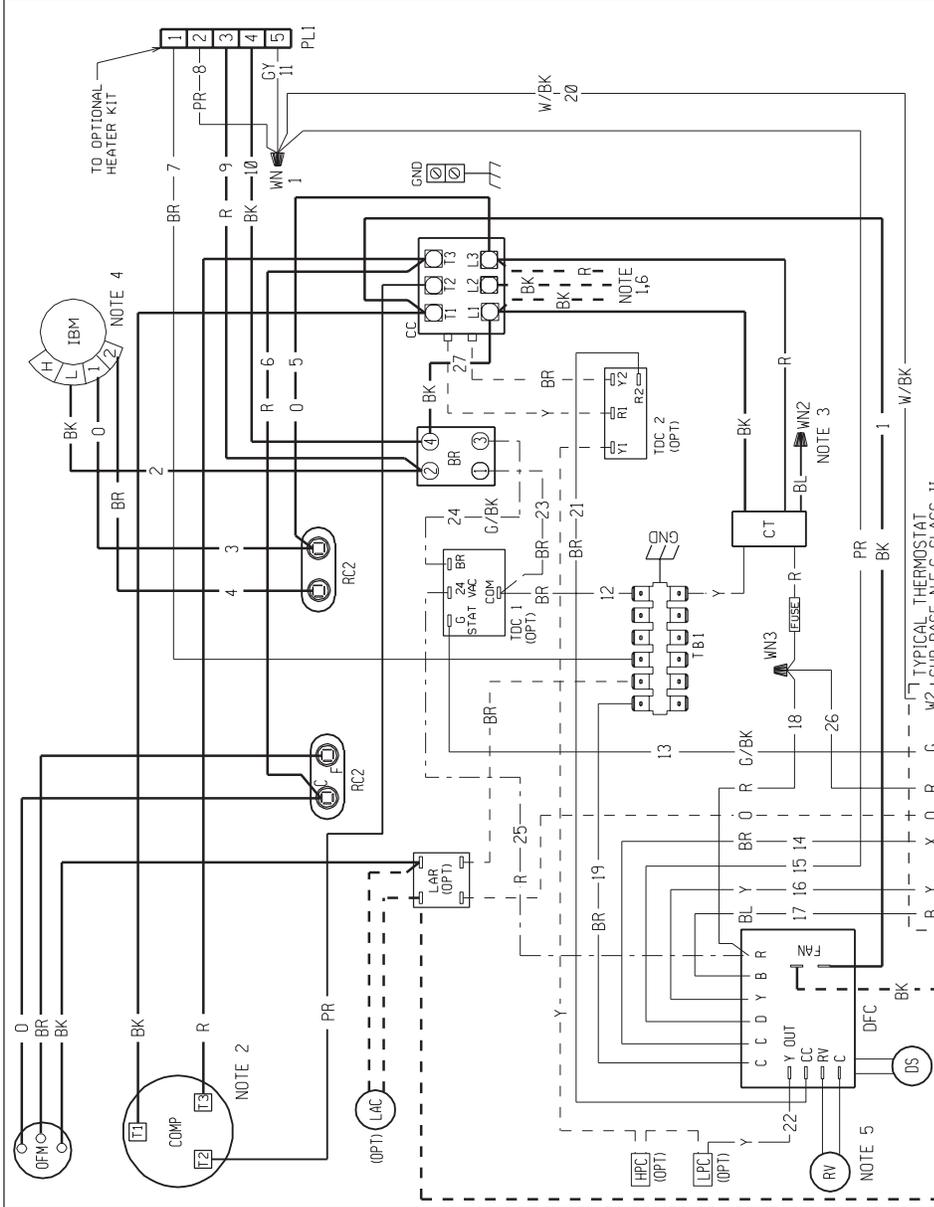

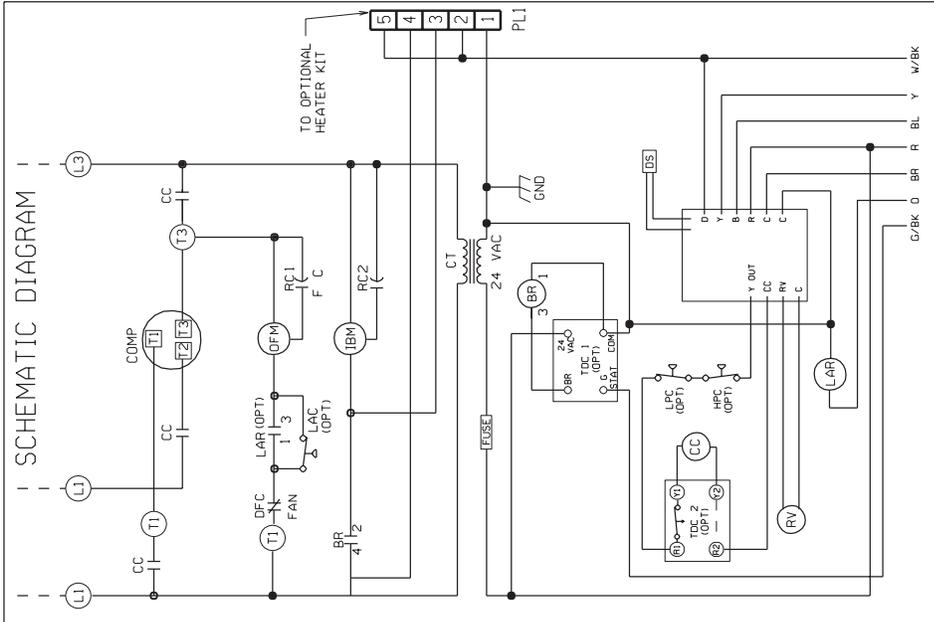

LOW VOLTAGE
-FACTORY STANDARD
-FACTORY OPTION
-FIELD INSTALLED

REPLACEMENT WIRE
-MUST BE THE SAME SIZE AND TYPE OF INSULATION AS ORIGINAL (105 C° MIN.)
WARNING
-CABINET MUST BE PERMANENTLY GROUNDED AND CONFORM TO I.E.C., N.E.C., C.E.C. AND LOCAL CODES AS APPLICABLE.

- NOTES:**
- CONNECTORS SUITABLE FOR USE WITH COPPER CONDUCTORS ONLY.
 - COMPRESSOR MOTOR THERMALLY PROTECTED.
 - TRANSFORMER FACTORY WIRED FOR 230 VOLTS. USE RED AND BLUE LEADS FOR 208 VOLTS.
 - MOTOR FACTORY WIRED FOR LOW SPEED. SEE AIRFLOW TABLES IN INSTALLATION INSTRUCTIONS TO DETERMINE CORRECT SPEED FOR UNIT APPLICATION.
 - THIS COMPONENT ENERGIZED IN HEATING.
 - FIELD WIRING OR CONNECTION FROM HEATER KIT FUSE BLOCK.

BEFORE PURCHASING THIS APPLIANCE, READ IMPORTANT ENERGY COST AND EFFICIENCY INFORMATION AVAILABLE FROM YOUR RETAILER.

GENERAL TERMS OF LIMITED WARRANTY

Rheem will furnish a replacement for any part of this product which fails in normal use and service within the applicable periods stated, in accordance with the terms of the limited warranty.

For Complete Details of the Limited Warranty, Including Applicable Terms and Conditions, See Your Local Installer or Contact the Manufacturer for a Copy.

Compressor	
1 Phase, Residential Applications	Ten (10) Years
13 & 14 SEER, Commercial Applications	Five (5) Years
Any Other Part	Five (5) Years
1 Phase, Residential Applications	Five (5) Years
1 & 3 Phase, Commercial Applications	One (1) Year

Before proceeding with installation, refer to installation instructions packaged with each model, as well as complying with all Federal, State, Provincial, and Local codes, regulations, and practices.
